Mla Citation Exercises With Answers:

Teaching Information Literacy Reframed Joanna M. Burkhardt, 2016-06-02 The six threshold concepts outlined in the Framework for Information Literacy for Higher Education are not simply a revision of ACRL's previous Information Literacy Competency Standards for Higher Education. They are instead an altogether new way of looking at information literacy. In this important new book, bestselling author and expert instructional librarian Burkhardt decodes the Framework, putting its conceptual approach into straightforward language while offering more than 50 classroom-ready Framework-based exercises. Guiding instructors towards helping students cross each threshold, this book discusses the history of the development of the Framework document and briefly deconstructs the six threshold concepts. Thoroughly addresses each threshold concept scaffolding from the beginner level to the intermediate level. Includes exercises that can be used in the one-shot timeframe as well as others designed for longer class sessions and semester-long courses. Offers best practices in creating learning outcomes, assessments, rubrics, and teaching tricks and tips, and looks at how learning memory and transfer of learning applies to the teaching of information literacy. Offering a solid starting point for understanding and teaching the six threshold concepts in the Framework, Burkhardt's guidance will help instructors create their own local information literacy programs.

Combating Plagiarism Terry Darr, 2019-09-24 Offers an instructional plan for plagiarism education for middle school and high school students, allowing librarians to become a resource for students, teachers, and school administrators. The proliferation of resources now available through libraries and the internet requires a new set of information management skills in order for students to avoid plagiarism. While educators legitimately expect students to approach academic work with honesty and integrity, students need to be able to understand the context of their academic resources, both print and digital, well enough to use them appropriately and ethically. *Combating Plagiarism* helps middle and high school teachers and librarians understand and teach the authorship and publication process so students learn to use relevant information in an ethically and academically sound fashion. Terry Darr's long-term collaboration with a high school history teacher taught her the challenges faced by students conducting research and by librarians and teachers tasked with teaching plagiarism prevention. Her book is full of tested concepts for teaching these complex topics, emphasizing our modern reliance on digital sources. An extensive student reference section covers common knowledge, fact, and opinion. A wealth of practical resources includes real-life examples from research papers as well as plenty of instructional materials, exercises, and lesson plans.
