sets performance goals that align with the enterprise's strategic plan. Then each quarter teams measure and report their progress towards achieving their stated goals. To create and deploy your TMS, RMT recommends a four-phase approach. Phase 1: Executive Leadership launches the TMS. In this initial phase, Right-Minded Teamwork is implemented in the executive team. RMT is adopted as the enterprise's standard teamwork process, and leadership establishes a Steering Team that will launch and initially manage the TMS. Phase 2: Steering Team creates, organizes, and pilots the TMS. Here the newly established Steering Team creates the enterprise's startup TMS, chooses team facilitators, pilots the startup TMS in a few teams, and fine-tunes the TMS in preparation for a broader enterprise rollout. Phase 3: Teams measure and report performance; rollout expands to more teams. Within three to four months after startup, the first quarterly TMS results are reported. The TMS is rolled out to more teams over the following 12 to 18 months. Within 12 to 24 months, TMS quarterly reports demonstrate beneficial enterprise results. Phase 4: Full rollout complete. TMS continues for growth and sustainability. Eventually the TMS is rolled out across the organization, and all teams participate. At this time, with the executive team's support and guidance, the Steering Team is transformed into a stable growth and management phase. The entire organization continues to use and benefit from the TMS. When a single team within an organization works together as one, they are effective and productive, but when an enterprise works with the same level of synergy, it is exponentially more powerful.
