Characterization, Testing, Measurement, and Metrology Chander Prakash, Sunpreet Singh, J. Paulo

Davim, 2020-10-25 This book presents the broad aspects of measurement performance analysis and characterization for materials and devices through advanced manufacturing processes. The field of measurement and metrology as a precondition for maintaining high quality products, devices and systems in materials and advanced manufacturing process applications has grown substantially in recent years. The focus of this book is to present smart materials in numerous technological sectors such as automotive, bio manufacturing, chemical, electronics, energy and construction. Advanced materials have novel properties and therefore must be fully characterized and studied in depth so they can be incorporated into products that will outperform existing products and resolve current problems. The book captures the emerging areas of materials science and advanced manufacturing engineering and presents recent trends in research for researchers, field engineers and academic professionals.

Science, Characterization and Technology of Joining and Welding Meysam Haghshenas, 2020-05-22

As the Guest Editor of this Special Issue entitled Science Characterization and Technology of Joining and Welding of Metals, I am pleased to have this book published by MDPI. Joining, including welding, soldering, brazing and assembly, is an essential requirement in manufacturing processes and is classified as a secondary manufacturing process. This Special Issue of Metals includes technical and review papers on, but not limited to, different aspects of joining and welding, including welding technologies, i.e., fusion based welding and solid state welding, characterization, metallurgy and materials science, quality control and design and numerical simulation. This Special Issue also includes the joining of different materials, including metal and non-metals, polymers and composites, including 17 peer reviewed papers from several researchers all around the globe: China, Germany, Brazil, South Korea, Slovakia, USA, Taiwan, Canada and India. As of this date, April 2020, the papers in this Special Issue have been cited 47 times by other researchers, which I think is an eminent number and shows the high quality of the published papers in this Issue. This Special Issue includes a large diversity of various subjects in the field of joining: laser welding, friction stir welding, diffusion bonding, multipass welding, rotary friction welding, friction bit joining, adhesive bonding, weld bonding, simulation and experimentation, metal FRP joints, welding simulation, plasma TIG coupled arc welding, liquation cracking, soldering, resin bonding, microstructural characteristics, brazing and friction stir butt and scarf welding. I would like to sincerely thank all the researchers who contributed to this Special Issue for their high quality research. I also would like to acknowledge Mr. Toliver Guo, Senior Assistant Editor at MDPI, who continuously and tirelessly contributed toward this Special Issue by assisting me with inviting the authors and the follow ups. I think this Special Issue will enhance our knowledge and understanding in the field of joining and assembly. I would like to dedicate this book to my wife Mehrnoosh for her continued support and encouragement.
