Turbochargers and Turbocharging Institution of Mechanical Engineers, 2012-05-11 This book presents the papers from the latest international conference following on from the highly successful previous conferences in this series held regularly since 1978. Papers cover all current and novel aspects of turbocharging systems design for boosting solutions for engine downsizing. The focus of the papers is on the application of turbocharger and other pressure charging devices to spark ignition SI and compression ignition CI engines in the passenger car and commercial vehicles. Novel boosting solutions for diesel engines operating in the industrial and marine market sectors are also included. The current emission legislations and environmental trends for reducing CO₂ and fuel consumption are the major market forces in the transport land and marine and industry sectors. In these market sectors the internal combustion engine is the key product where downsizing is the driver for development for both SI and CI engines in the passenger car and commercial vehicle applications. The more stringent future market forces and environmental considerations mean more stringent engine downsizing thus novel systems are required to provide boosting solutions including hybrid electric motor and exhaust waste energy recovery systems for high efficiency response reliability durability and compactness etc. For large engines the big challenge is to enhance the high specific power and efficiency whilst reducing emission levels NO_x and SO_x with variable quality fuels. This will require turbocharging systems for very high boost pressure efficiency and a high degree of system flexibility. Presents papers from all the latest international conference. Papers cover all aspects of the turbocharging systems design for boosting solutions for engine downsizing. The focus of the papers is on the application of turbocharger and other pressure charging devices to spark ignition SI and compression ignition CI engines in the passenger car and commercial vehicles.
