Metric Pattern Cutting for Children's Wear and Babywear Winifred Aldrich,2012-06-27 This fourth edition of Metric Pattern Cutting for Children s Wear and Babywear remains the standard text book but has three major improvements First the sections have been re organised to reflect changes in producing and marketing children s clothes Today s popularity of easy fitting styles and knitted fabrics means that basic flat pattern cutting is used to construct the majority of children s wear and babywear and this type of cutting is therefore emphasised in this new edition Shaped blocks and garments cut to fit the body form are still included and are placed in chapters covering some school uniform garments or more expensive fashion or formal clothes The book now clearly separates the sections useful to student beginners Parts One Two and Three and also offers more advanced or

specialist sections for students who wish to pursue a career in children's wear or for designers working in the different manufacturing sectors of the trade The second change in this fourth edition is the introduction of colour coding to the sections this makes it easier to identify specific processes in the book and enhances the illustrations Finally the size charts have been revised to reflect the changes in body sizing The clear division of the boys and girls measurements in the charts has been in response to the way clothes are marketed and to co-ordinate with European size charts Plus charts for heavier children have also been added

Colour Forecasting for Fashion Debra Johnston Cobb, Debra Johnston Cobb, Kate Scully, 2012-02-12 Colour is a powerful selling tool It is the first thing to catch the consumer's eye in the shop window Get the colour choice wrong and an entire range can stay on the racks So how do colours arrive on the catwalk or the sales floor and why do different companies all seem to choose similar colours each season The answer lies in the work of the huge colour forecasting industry With case studies that show the industry at work this book breaks down the forecasting process from how to put together a colour palette to colour theory and the way that colours behave and helps you to build the combination of research and intuitive skills that a successful designer or forecaster needs

Sustainability in Fashion and Textiles Miguel Angel Gardetti, Ana Laura Torres, 2017-09-08

There is no doubt that the textile industry the production of clothing fabrics thread fibre and related products plays a significant part in the global economy It also frequently operates with disregard to its environmental and social impacts The textile industry uses large quantities of water and outputs large quantities of waste As for social aspects many unskilled jobs have disappeared in regions that rely heavily on these industries Another serious and still unresolved problem is the flexibility textile industry companies claim to need Faced with fierce international competition they are increasingly unable to offer job security This is without even considering the informal sector work proliferating both in developing and developed countries Child labour persists within this sector despite growing pressure to halt it Fashion demands continuous consumption In seeking to own the latest trends consumers quickly come to regard their existing garments as inferior if not useless Old items become unwanted as quickly as new ones come into demand This tendency towards disposability results in the increased use of resources and thus the accelerated accumulation of waste It is obvious to many that current fashion industry practices are in direct competition with sustainability objectives yet this is frequently overlooked as a pressing concern It is however becoming apparent that there are social and ecological consequences to the current operation of the fashion industry sustainability in the sector has been gaining attention in recent years from those who believe that it should be held accountable for the pressure it places on the individual as well as its contribution to increases in consumption and waste disposal This book takes a wide screen approach to the topic covering among other issues sustainability and business management in textile and fashion companies value chain management use of materials sustainable production processes fashion needs and consumption disposal and innovation and design The book will be essential reading for researchers and practitioners in the global fashion business

fashion ir muito al m da pr xima esta o **Sustainable Fashion, Migrants, Embroidery** Alessandra Lopez y Royo, 2024-07-11 Sustainable Fashion Migrants Embroidery Ateliers of Social Integration tells of community led solidarity ateliers engaged in sewing and embroidery activities which in the Global North and Global South are providing a vital alternative to neoliberal and neo colonial fashion paradigms On encountering several ateliers solidaires sartorie sociali during her immersive fieldwork for which she travelled to Morocco and Southern Italy and contrasting her findings with her knowledge of parallel and analogous initiatives in London Alessandra Lopez y Royo suggests that despite their different outlook and approach these ateliers can be inscribed within an ever growing economy of solidarity and sharing With a uniquely combined focus on sustainability fashion and migration Lopez y Royo examines how the ateliers foreground a powerful social inclusion agenda encouraging migrants and refugees to collaborate exchange knowledge and foster communities on a level playing field with locals Questioning widely accepted notions of empowerment and social integration and drawing on her background in archaeology and material culture studies Lopez y Royo uses micro studies to illuminate a broader path to a more inclusive sustainable and socially conscious industry presenting a fresh perspective on repurposing and upcycling In a world grappling with the need to shift away from fast fashion s wasteful practices this thought provoking exploration shows how slow growth solidarity ateliers can challenge the widely accepted notions of both fashion and social integration *Sustainability in Art, Fashion and Wine* Annamma Joy, 2024-03-18 The art fashion and wine industries are currently at various stages in their efforts to embrace and transition towards sustainability While sustainability commitments are a necessary condition for progress they are not sufficient Instead there is a need for sweeping transformative change that includes giving serious consideration to indigenous worldviews without recolonizing them Sustainability in Art Fashion and Wine includes findings from recent research and contributes to a new understanding of familiar concepts such as sustainability de colonization and corporate responsibility in the art fashion and wine industries by adopting critical lenses and incorporating them with innovative perspectives on circular business models and digitalization It endeavors to present remedies for effectively combating climate change and promoting social good While discussing specific issues such as sub contracted labor safe working conditions living wages environmental degradation mismanaged waste and more the book argues that recognizing the significant role western colonization has played and continues to play in the developing world in our current conception of capitalism is itself unsustainable To understand the true meaning of sustainability to fully recognize the looming deadlines we face in combating the climate crisis and instituting sustainability as a new normal the acceptance of a new conception of capitalism one antithetical to colonization and exploitation is required Contributors to this book address these issues by applying a critical studies approach to their respective chapters allowing the book to set out what real sustainability could and should look like in the art fashion and wine industries **Predicción de tendencias del color en moda** Kate Scully, Debra Johnston Cobb, 2013-02-23 El color es una potente herramienta de venta Es el primer

elemento que llama la atención del consumidor desde el escaparate. Cómo deciden una marca o una tienda la paleta de colores más adecuados para sus productos.Cuál es el proceso por el que los diseñadores, los equipos de desarrollo de productos y los responsables de compras eligen los colores. Y de dónde proceden esos colores. La respuesta está en la predicción del color que consiste en el proceso de anticipar las orientaciones de color y tendencias para todo el espectro de productos de moda y sectores afines. La función de la predicción del color es investigar, anticipar y finalmente interpretar el color de forma que ayude a diseñadores, desarrolladores de productos y vendedores a elegir colores que resulten atractivos al consumidor y potencien las ventas de un producto. Este libro examina la predicción del color explorando cómo y por qué se desarrollan las paletas para las temporadas y ofrece ejemplos prácticos de cómo funciona este sector desde la elaboración de una paleta hasta la teoría del color o las relaciones entre los colores. Una guía práctica que resultará de gran interés para estudiantes de diseño de moda, desarrollo de productos o marketing y promoción de moda ya que analiza las herramientas para desarrollar combinaciones de estudio así como las habilidades y metodologías necesarias para elaborar una paleta de color que conecte con los deseos y necesidades del consumidor.
