Introduction to financial accounting theory

Learning objectives

Upon completing this chapter readers should:

- understand that there are many theories of financial accounting;
- be aware of the importance that knowledge of different accounting theories has in understanding and evaluating various financial accounting practices;
- understand that the different theories of financial accounting are often developed to perform different functions, such as to describe accounting practice, or to prescribe particular accounting practices;
- understand that theories, including theories of accounting, are developed as a result of applying various value judgements and that acceptance of one theory, in preference to others, will in part be tied to one's own value judgements;
- be aware that we should critically evaluate theories (in terms of such things as the underlying logic, assumptions made and evidence produced) before accepting them.
