This book brings fresh ideas and an innovative approach to accountancy theory and practice as well as critical views about professional thinking in accountancy. The reader will find advanced approaches regarding business objectives with social responsibility principles. A new role of accountancy is founded for a sustainable society. The responsibility of individuals is emphasized through behavioural analysis. The book has an interdisciplinary character and will be interesting for students, doctoral students, academics, and practitioners as well. On this basis, a new role and a new structure of accountancy is offered.     **The Routledge Companion to Accounting, Reporting and Regulation** Carien van Mourik, Peter Walton, 2013-10-01 Financial accounting reporting and regulation is a vast subject area of huge global importance with interest rising significantly in the light of the ongoing global financial crisis. The authors begin with a broad overview of the subject of accounting, setting the stage for a discussion on the theoretical and practical issues and debates regarding financial reporting, which are expanded on in the second part of the book. This includes how to define the reporting entity, recognition and measurement of the elements of financial statements, fair values in financial reporting, and the costs and benefits of disclosure. The third part assesses the interest need and theories behind the accounting reporting and regulation industry, while parts four and five look at the institutional, social, and economic aspects with issues such as accounting for environmental management and accounting regulation and financial reporting in Islamic countries, both issues of ever increasing importance. This authoritative Companion presents a broad overview of the state of these disciplines today and will provide a comprehensive reference source for students and academics involved in accounting.
