It shows the financial basics that a manager of any small, medium or large company should know and will leave you confident enough to ask the right business questions and make the correct finance decisions. The first part, Operational Finance, deals with the basics of financial analysis or analysis of the Profit and Loss and balance sheet so that they can be used to help make decisions. The second part, Structural Finance, covers investment and financing decisions as well as how to finance the investments planned. The book finishes with a chapter on valuation of companies.
