Motives for Metaphor in Scientific and Technical Communication Timothy Giles, Charles Sides, 2017-03-02 Examination of the work of scientific icons Newton Descartes and others reveals the metaphors and analogies that directed their research and explain their discoveries Today scientists tend to balk at the idea of their writing as rhetorical much less metaphorical How did this schism over metaphor occur in the scientific community To establish that scientists should use metaphors to explain science to the public and need to be conscious of how metaphor can be useful to their research this book examines the controversy over cloning and the lack of a metaphor to explain it to a public fearful of science's power The disjunction between metaphor and science is traced to the dispensation of the Solar System Analogy in favor of a mathematical model Arguing that mathematics is metaphorical the author supports the idea of all language as metaphorical unlike many rhetoricians and philosophers of science who have proclaimed all language as metaphorical but have allowed a distinction between a metaphorical use of language and a literal use For technical communication pedagogy the implications of this study suggest foregrounding metaphor in textbooks and in the classroom Though many technical communication textbooks recommend metaphor as a rhetorical strategy some advise avoiding it and those that recommend it usually do so in a paragraph or two with little direction for students on how to recognize metaphors or to how use them This book provides the impetus for a change in the pedagogical approach to metaphor as a rhetorical tool with epistemological significance

Technical Communication 9e + Comment Mike Markel, Roger Munger, Walter Creed, 2009-02-01 [Re Visioning Composition Textbooks](#) Xin Liu Gale, Fredric G. Gale, 1999-04-23 An exploration of the sometimes tenuous relationship between textbooks and the discipline of composition and rhetoric [Re Visioning Composition Textbooks](#) critically

scrutinizes the culture of textbooks from the vantage point of scholars and teachers It examines a variety of textbooks including standard rhetorics handbooks cross cultural anthologies readers technical textbooks and argumentation textbooks Different perspectives are used to discuss the cultures ideologies traditions and the material and political conditions that influence the writing and publishing of these works Contributors raise challenging questions about the relationship between textbooks and the cultures which produce them the discipline of which they are an indispensable part and the classrooms in which they are to have their most tangible effects on teaching and learning Forthcoming Books Rose Arny,2002
