Miller Turner, 1987 *Discovering History in China* Paul A Cohen, 2010-04-29 Since its first publication Paul A Cohen's *Discovering History in China* has occupied a singular place in American China scholarship. Translated into three East Asian languages, the volume has become essential to the study of China from the early nineteenth century to today. Cohen critiques the work of leading postwar scholars and is especially adamant about not reading China through the lens of Western history. To this end, he uncovers the strong ethnocentric bias pervading the three major conceptual frameworks of American scholarship of the 1950s and 1960s: the impact response, modernization, and imperialism approaches. In place of these, Cohen favors a China-centered approach in which historians understand Chinese history on its own terms, paying close attention to Chinese historical trajectories and Chinese perceptions of their problems rather than a set of expectations derived from Western history. In an important new introduction, Cohen reflects on his fifty-year career as a historian of China and discusses major recent trends in the field. Although some of these developments challenge a narrowly conceived China-centered approach insofar as they enable more balanced comparisons between China and the West and recast the Chinese and their history in more human, less exotic terms, they powerfully affirm the central thrust of Cohen's work. The History of England, During the Reigns of K. William, Q. Anne and K. George I. James Ralph, 1744 **The Language of Public Administration** David John Farmer, 1995-07-30 Coping with the practical problems of bureaucracy is hampered by the limited self-conception and the constricted mindsets of mainstream public administration thinking. Modernist public administration theory, although valuable and capable of producing ever more remarkable results, is limiting as an explanatory and catalytic force in resolving fundamental problems about the nature, size, scope, and functioning of public bureaucracy and in transforming public bureaucracy into a more positive force. This original study specifies a reflexive language paradigm for public administration thinking and shows how a postmodern perspective permits a revolution in the character of thinking about public bureaucracy. The author considers imagination, deconstruction, deterritorialization, and alterity. Farmer's work emphasizes the need for an expansion in the character and scope of public administration's disciplinary concerns and shows clearly how the study and practice of public administration can be reinvigorated. *History of Randolph County, Indiana*. E. Tucker, 1882 Overland Monthly and Out West Magazine, 1896 **Sedimentary Response to Intrabasinal Salt Tectonism in the Upper Triassic Chinle Formation, Paradox Basin, Utah** Joseph Ernest Hazel, 1994 A multidisciplinary approach to research studies of sedimentary rocks and their constituents and the evolution of sedimentary basins, both ancient and modern. *The West Virginia School Journal*, 1888 **A History of Education in Antiquity** Henri Irénée Marrou, 1982 H. I. Marrou's *A History of Education in Antiquity* has been an invaluable contribution in the fields of classical studies and history ever since its original publication in French in 1948. French historian H. I. Marrou traces the roots of classical education from the warrior cultures of Homer to the increasing importance of rhetoric and philosophy to the adaptation of Hellenistic ideals within the Roman education system and ending with the rise of Christian schools and

churches in the early medieval period Marrou shows how education once formed as a way to train young warriors eventually became increasingly philosophical and secularized as Christianity took hold in the Roman Empire Through his examination of the transformation of Greco Roman education Marrou is able to create a better understanding of these cultures
