Student Resistance to Dictatorship in Chile, 1973-1990 Richard G. Smith, 2024-09-30 This book documents and analyses Chilean university and school students opposition to the Pinochet regime during the latter years of the 1970s and the 1980s The book focuses on key episodes such as the establishment of cultural groups within the militarily controlled universities that enabled students to congregate and exchange ideas for the first time since the 1973 coup how university and secondary school students created their own democratic institutions to challenge the regime appointed bodies and how these eventually led to the restoration of the national federations that had been banned by the military government The author explores the key relationship between the vertically organised underground political parties and the horizontally organised broad non partisan organisations created by the students arguing that this structure brought advantages to the movement The students contribution to the national protests in the 1980s ensured that opposition to the regime was highly visible in the city centre resulting in a socially broadened opposition with a focus on youth rather than disenfranchisement and poverty Offering a detailed account of different forms of student activism this book evaluates the role of school and university students within the broader anti dictatorship opposition in Chile **Pros and Cons** Debbie Newman, Trevor Sather, Ben Woolgar, 2013-10-08 Pros and Cons A Debaters Handbook offers a unique and invaluable guide to the arguments both for and against over 140 current controversies and global issues Since it was first published in 1896 the handbook has

Numerous studies concerning transitional justice exist However comparatively speaking the effects actually achieved by

measures for coming to terms with dictatorships have seldom been investigated There is an even greater lack of transnational analyses This volume contributes to closing this gap in research To this end it analyses processes of coming to terms with the past in seven countries with different experiences of violence and dictatorship Experts have drawn up detailed studies on transitional justice in Albania Argentina Ethiopia Chile Rwanda South Africa and Uruguay Their analyses constitute the empirical material for a comparative study of the impact of measures introduced within the context of transitional justice It becomes clear that there is no sure formula for dealing with dictatorships Successes and deficits alike can be observed in relation to the individual instruments of transitional justice from criminal prosecution to victim compensation Nevertheless the South American states perform much better than those on the African continent This depends less on the instruments used than on political and social factors Consequently strategies of transitional justice should focus more closely on these contextual factors
