

Industrial Attachment System

Importance and Purpose

Both the Students and TCT as an institution can get some benefits from Industrial Attachment system. The purpose of Industrial attachment includes

- To cultivate the student's professionalism, aptitude, attitude and adaptive skills in real-life situations;
- To further develop the student's interpersonal and collaborative skills through working with fellow colleagues;
- To boost the student's technical and design competency;
- To prepare the student for ready absorption into the workforce in Alternative Energy (AE) or Electronics & Telecommunication (ET) or Information Technology (IT) industries;
- To help forge and support a closer relationship between the AE, ET and IT industries and TCT.

Objectives

Trainees will be able to:

- Appreciate the importance of human relationships and work attitudes.
- Understand the constraints of working life and functional relationships within and between organizations.
- Be orientated towards work processes.
- Apply theoretical concepts and school based skills to practice.
- Develop work attitudes like curiousness, self-confidence, maturity and self-reliance.
- Obtain knowledge of potential careers and develop new areas of interest.

Employers will be able to:

- Know future skills availability.
- Improve the training delivered at training institutions for industrial relevance.
- Influence the training of future generation of employees.

What Are The Objectives Of Industrial Attachment

Vincent Miller

What Are The Objectives Of Industrial Attachment:

Articles Training Guide ICAI, Articleship Training Guide as issued by ICAI contains all the regulations related to CA course during Articleship training period in simplified language The book is must read for the CA Students who are undergoing Articleship or is going to join the training in order to know their rights and responsibilities Cooperative and Work-Integrated Education in Asia Yasushi Tanaka, Karsten Zegwaard, 2018-09-28 It has been over a century since Cooperative System of Education a work study programme for higher education was initiated by Herman Schneider at University of Cincinnati in the United States Today it is known as Cooperative Education which is commonly included within the umbrella term of Work Integrated Learning and broadly referred to by the World Association of Cooperative Education WACE as Cooperative and Work Integrated Education CWIE Its development worldwide has been closely related to the socioeconomic background of the region This book offers the first attempt to focus on the development of CWIE in Asia To date the development of CWIE in the Asia region has been slow compared to their counterparts The analysis follows international comparisons of China Japan Korea Hong Kong Vietnam Thailand Malaysia and Singapore on their educational history vocational education CWIE and future issues Although the level of development varies among them there is no doubt that this region as a whole is experiencing a rapidly growing global demographic and economic prominence CWIE can and to some extent already does play an important supportive role as part of growth The book goes on to conclude that in order to enable further successful expansion of CWIE and improve its best practice it is imperative to establish national and regional associations for CWIE as well as establish collaborative research activities across the region with governmental funding support **The Guidebook for International Trainers in Business and Industry** Vincent Miller, 2000-12 This book is written to meet a growing need for skilled manpower in business and industry The author examines the training function its limitations and alternatives and the factors that generate a need for training He outlines a complete strategy for starting a training program in a developing country with procedures for setting up administrative arrangements and establishing objectives Thirty four training techniques are fully described with applications and tips on optimum usage Handy charts checklists decision tables and grids help in assembling the necessary data and arriving at an effective action plan Several widely used training systems are thoroughly detailed including the advantages and disadvantages This book examines measurement and feedback devices and provides guidelines for selecting and evaluating trainers course designers and administrators It analyzes funding procedures and gives instructions for setting up a chart of accounts and preparing a zero base budget Decision makers for countries corporations and organizations will use this book for to determine whether training meets their socio economic goals and for a wide variety of other decisions related to training Experienced trainers and human resources developers will welcome its proven guidelines for every area of international multinational and cross cultural training New trainers will find it an authoritative source of ready to use training methods **Manpower Research**
