Modern Transnational Yoga
Hannah K. Bartos, 2021-03-23 This is the first book to address the social organisation of modern yoga practice as a primary focus of investigation and to undertake a comparative analysis to explore why certain styles of yoga have successfully transcended geographical boundaries and endured over time whilst others have dwindled and failed Using fresh empirical data of the different ways in which posture practice was disseminated transnationally by Krishnamacharya Sivananda and their leading disciples the book provides an original perspective The author draws upon extensive archival research and numerous fieldwork interviews in India and the UK to consider how the field of yoga we experience today was shaped by historic decisions about how it was transmitted The book examines the specific ways in which a small group of yogis organised their practices and practitioners to popularise their styles of yoga to mainstream audiences outside of India It suggests that one of the most overlooked contributions has been that of Sivananda Saraswati 1887-1963 for whom this study finds his early example acted as a cornerstone for the growth of posture practice Outlining how yoga practice is organised today on the world stage how leading brands fit into the wider field of modern yoga practice and how historical developments led to a mainstream globalised practice this book will be of interest to researchers in the field of Yoga Studies Religious Studies Hindu Studies South Asian History Sociology and Organisational Studies

Regimes of Happiness Yuri Contreras-Vejar, Joanna Tice Jen, Bryan S. The Oxford History of Hinduism Gavin Flood, 2020 Traditions of asceticism, yoga and devotion, bhakti including dance and music developed in Hinduism over long periods of time Some of these practices notably those denoted by the term yoga are orientated towards salvation from the cycle of reincarnation and go back several thousand years These practices borne witness to in ancient texts called Upanishads as well as in other traditions notably early Buddhism and Jainism are the subject of this volume in the Oxford History of Hinduism Practices of meditation are also linked to asceticism, tapas and its institutional articulation in renunciation, sannyasa There is a range of practices or disciplines from ascetic fasting to taking a vow, vrata for a deity in return for a favour There are also devotional practices that might involve ritual making an offering to a deity and receiving a blessing, dancing or visualization of the master guru The overall theme the history of religious practices might even be seen as being within a broader intellectual trajectory of cultural history In the substantial introduction by the editor this broad history is sketched paying particular attention to what we might call the medieval period post-Gupta through to modernity when traditions had significantly developed in relation to each other The chapters in the book chart the history of Hindu practice paying particular attention to indigenous terms and recognizing indigenous distinctions such as between the ritual life of the householder and the renouncer seeking liberation between inner practices of and external practices of ritual and between those desirous of liberation, mumukshu and those desirous of pleasure and worldly success, bhuktu This whole range of meditative and devotional practices that have developed in the history of Hinduism are represented in this book

Asian Medicine and Globalization Joseph S. Alter, 2013-03-26 Medical systems function in specific cultural contexts It is common to speak of the medicine of China, Japan

India and other nation states Yet almost all formalized medical systems claim universal applicability and thus are ready to cross the cultural boundaries that contain them There is a critical tension in theory and practice in the ways regional medical systems are conceptualized as nationalistic or inherently transnational This volume is concerned with questions and problems created by the friction between nationalism and transnationalism at a time when globalization has greatly complicated the notion of cultural political and economic boundedness Offering a range of perspectives the contributors address questions such as How do states concern themselves with the modernization of traditional medicine How does the global hegemony of science enable the nationalist articulation of alternative medicine How do global discourses of science and new age spirituality facilitate the transnationalization of Asian medicine As more and more Asian medical practices cross boundaries into Western culture through the popularity of yoga and herbalism and as Western medicine finds its way east these systems of meaning become inextricably interrelated These essays consider the larger implications of transmissions between cultures
