The Dynamics of Technology G. Barbiroli, 2013-03-14 Technology is taking on an increasingly central and determining role in society and can provide contradictory results wealth on the one hand but also unemployment environmental imbalances and other social problems on the other Manufacturing techniques and production organization are chosen in every country based mainly on the specific needs of the companies while the real needs of each population are often quite different Already in order to prevent all forms of technology from becoming increasingly invasive towards both the natural supply of resources and the specific though highly differentiated needs of humanity technological paths must be identified and followed which are capable of making the various needs compatible from the standpoint of sustainable development the conservation and increase in value of natural resources and the quality of development This will become increasingly important in the future This goal is undoubtedly ambitious and difficult to achieve however evidence of the problems caused by generalized uncontrolled use of technology all over the world leads us to believe that intense efforts must be made to achieve this aim If not humankind runs the risk of an irreversible degradation of the most important aspects of economic development and its quality Within this framework those companies that produce goods and services obviously occupy a central active role which they must play with a view both to competitiveness and overall qualification and to contributing to the objectives of sustainable development

Untersuchungen des Schwingungs- und Geräuschverhaltens des Kurbeltriebs eines Verbrennungsmotors Daniel Hrdina, 2016-02-25 Durch die Kombination verschiedener Messtechnikkonzepte im Bereich der Körperschallmessung und der Verwendung detaillierter Signalanalyseverfahren kann Daniel Hrdina ein gesamtheitliches Verständnis der Körperschallleitung über den Kurbeltrieb eines Verbrennungsmotors darstellen. Dabei untersucht er die Sensitivität auf verschiedene Parameter im inneren Leitweg und in den Anregungsbedingungen. Als einflussreichsten Faktor identifiziert der Autor die Druckanstiegsrate und damit die Einspritzparameter. Darauf aufbauend führt er den Begriff des betriebspunktabhängigen Brennraumdruckgradienten ein, der Potenziale zur Optimierung unter NVH Gesichtspunkten an einem PKW Dieselmotor mit Common Rail Einspritzung aufzeigt.

Eiskalt Marcus Gieseke, 2014-11-14 Die Ironie des Schicksals trifft viele Zeitgenossen ziemlich unvermittelt. Auch Mörder sind manchmal darunter. Angesehene Bürger mit einer dunklen Seite tragen zur Dezimierung der Bevölkerung bei. Auch dramatisch endende Mittagessen kommen vor. Genau die Dinge, von denen diese vier Kurzgeschichten handeln. Kurz gesagt: Die Welt beheimatet eine Menge Verrückter. Aber einigen von ihnen sollte man besser niemals begegnen.
