ausgehende Druck auf Kosten und Margen auf nahezu alle Branchen zwingt sowohl politische Entscheidungsträger als auch Strategen im Umfeld der Bankenwirtschaft in Europa ihre Ideen und Vorstellungen über das zukünftige Finanzsystem, die strategische Positionierung und Geschäftsmodelle einzelner Bankentypen bzw. die Struktur der Bankenlandschaft nachzudenken. In der vorliegenden Arbeit beschäftigt sich der Autor mit der Struktur des Bankensektors in Europa nach dem aktuell in Gang befindlichen Transformationsprozess. Die Ursachen für den aktuellen Transformationsprozess bzw. für den Strukturwandel innerhalb der Branche in Europa und Österreich sind bislang wissenschaftlich noch nicht ausreichend erforscht. Tatsache ist, dass auf nationaler sowie gesamteuropäischer Ebene die Vielfalt an aktuellen Diskussionen zu unterschiedlichen Problembereichen in der Bankwirtschaft nahezu unüberschaubar geworden ist. Experten- und Praktikermeinungen über mögliche oder unmögliche Fusionen, sinnvolle oder nicht sinnvolle Geschäftsmodelle und strategische Positionierungen kursieren in diversen Fachpublikationen. Auf diversen internationalen Kongressen, Tagungen und Workshops werden quantitative Analysen, Branchenberichte sowie Studien vorgestellt, die den aktuellen Strukturwandel auf wenige Themenblöcke wie Inputreduktion, Effizienzsteigerung, Rentabilitätsoptimierungen, Profitabilität oder Wachstum, Marktmacht reduzieren. Zweckmäßig erscheint der Versuch, die wirtschaftspolitisch relevante Veränderung der Struktur des Bankensektors in Europa unter der besonderen Berücksichtigung von Zusammenschluss und Effizienzaspekten sowie rechtlichen und politischen Entwicklungen im Umfeld der Banken zu untersuchen. Wesentliche Veränderungen innerhalb bankbetriebswissenschaftlicher und ökonomischer Theorien rund um den Forschungsbereich Finanzintermediation zusammenzufassen, um aus den Erkenntnissen aus der Praxis und Theorie Empfehlungen für eine optimale Struktur des Bankensektors in Europa abzuleiten, erfolgt. Es soll dann geplant werden, wenn Entscheidungsträger wesentliche strukturelle und bankpolitische Trends zu erkennen bereit sind und Entwicklungen vorantreiben wollen.

Macrofinancial risk analysis Dale Gray and Samuel Malone
Macrofinancial Risk Analysis provides a new and powerful framework with which policymakers and investors can analyze risk and vulnerability in economies both emerging market and industrial. Using modern risk management and financial engineering techniques applied to the macroeconomy, an economic value can be placed on the risks posed by interlinkages between sectors, the risk of default of different sectors on their outstanding debt obligations quantified, and the value ex ante of guarantees to private sector entities by the government calculated. This book guides the reader through the basic macroeconomic and financial models necessary to understand the framework, the core analytical tools, and more advanced contributions that will be of interest to researchers. This unique synthesis of ideas from finance and macroeconomics offers several original contributions to the theory of financial crises as well as a range of new policy options for governments interested in achieving a better tradeoff between economic growth and macro risk. **International**

Competitiveness in Financial Services Marvin H. Kusters, A.H. Meltzer, 2012-12-06 financial markets suggests that factors such as differences in capital requirements limitations on size or on the range of financial activities in which firms can engage government guarantee arrangements for deposits or payments and reporting or disclosure requirements can have important effects on the efficiency of industrial and commercial firms and thus on the international competitive positions of major sectors of the U S economy Regulatory and tax policies must therefore take into account effects on international competitive positions in addition to domestic concerns The articles in this issue analyze differences in market organization and regulation across countries and examine how efficiency in producing financial services is influenced by these differences These articles were presented and discussed at a conference sponsored by the American Enterprise Institute in Washington D C on May 31 and June 1 1990 This conference on International Competitiveness in Financial Services brought to the attention of Washington policy officials these analyses by leading scholars in finance Publication of these studies and critiques in the Journal of Financial Services Research is intended to stimulate further interest in research on these important issues
