Financial Managerial Accounting 9th Edition:

FINANCIAL POLICY AND MANAGEMENT ACCOUNTING, Ninth Edition BANERJEE, BHABATOSH, 2017-05-01 This well received book now in its ninth edition provides a comprehensive analysis of the fundamental concepts of financial management and management accounting. The elegantly combined presentation of the various aspects of financial management and management accounting is a highlight of this text. Focusing on the core areas of financial management, basic concepts of finance, sources of finance, capital structure theories and planning, dividend policies, investment decisions, portfolio management and working capital management, as well as the areas of management accounting, changes in financial position, financial statement analysis and inter firm comparison, budgetary control and standard costing and cost information and management decisions, the book also delves on the contemporary topics such as financial environment, corporate governance and international financial management in detail. In addition, it contains a number of case studies on various areas of finance and management accounting. The current edition has been thoroughly revised, keeping in view contemporary developments in the literature and applicable provisions of the Companies Act 2013. Apart from updating the case studies, new cases have been added to support the relevance and quality of discussion. Intended primarily for postgraduate students of commerce, M Com and management, MBA with finance specialization, the book will also be highly useful for undergraduate students of Commerce and Management, students of professional courses such as CA and ICWA, as well as professionals in the fields of financial management and management accounting. The present treatise has been recommended by many Colleges, Management Institutes and Universities in India for their respective postgraduate and undergraduate commerce and management courses. *WORKING CAPITAL MANAGEMENT, Fourth Edition* BHATTACHARYA,

HRISHIKES, 2021-04-01 Working capital is commonly understood as the fund needed to meet the day to day expenses of an enterprise. A finance manager finds that the funds for meeting these expenses get blocked in current assets. He therefore looks for liquidity support in net working capital (NWC), which is equivalent to the excess of current assets over current liabilities. A banker also looks at the size of NWC as the long term stake of the business in funding the current assets. But for a production manager, liquidity is synonymous to uninterrupted supply of material inputs to the production lines. Similarly, for a marketing manager, if there is no production, his marketing outlets dry up despite demand in the market. While the finance manager discourages overstocking of inventory, the production manager and the marketing manager dread of being out of stock. In this conflict, the goal of the organisation often takes a back seat. This book aims at resolving these conflicts by adopting a techno-financial approach to working capital management. In the previous edition, a full chapter on Service Business Risk Analysis and Working Capital Assessment was introduced to understand the nature of service business and the risks associated with it, followed by developing a model for assessment of working capital requirement. Whereas in the Fourth Edition, a new chapter on Technological Progress, Innovations and Startups, A New Financing Methodology has been

introduced to fill a long felt gap in financing of emerging industries Besides the book is revised and updated extensively by incorporating the current researches in the field particular mention can be made of Cash pooling system Bullwhip effect and newer approaches to inventory recording system Throughout the book every concept is presented with worked out examples and case studies for easy comprehension of the subject The book is primarily addressed to postgraduate students majoring in Finance and to those pursuing professional courses in Accounts CA and Cost Accounting ICWA The book will also be very useful for practising finance executives risk managers and also purchase materials managers TARGET AUDIENCE o MBA Finance o CA and ICWA Aspirants Cost Accounting for Health Care Organizations Steven A.
