Critical Food Studies in Asia Arya Parakkate Vijayaraghavan, Dishari Chattaraj, 2024-10-30 This book offers a curated collection of scholarship that significantly contributes to the shaping of Critical Food Studies in Asia Drawing on a machine generated literature review of select Springer publications it highlights the critical turn in Food Studies rooted in the recognition that everyday social discourses surrounding food embody complex interrelations of power

dynamics identity politics and ideological underpinnings The book maps out key conceptual frameworks methods and methodologies from various disciplines offering insights into the understanding and analysis of foodways and practices The editors introductions accompanying the structured reviews open up discussions on prominent trajectories frameworks and future research scope in the area making it an essential reference point for scholars educators and students alike It also initiates deliberations on the complexities of working within a heterogeneous space like Asia while exploring its potential to evolve newer frameworks and alternative knowledge systems to critically engage with gastronomic practices The auto summaries have been generated by a recursive clustering algorithm via the Dimensions Auto summarizer by Digital Science The editors of this book selected which SN content should be auto summarized and decided its order of appearance Please be aware that these are extractive auto summaries which consist of original sentences but are not representative of its original paper since we do not show the full length of the publication Please note that only published SN content is represented here and that machine generated books are still at an experimental stage

Community Nutrition for Developing Countries

Norman J. Temple ,Nelia Steyn,2016-03-31 Nutrition textbooks used by universities and colleges in developing countries have very often been written by scholars who live and work in North America or the United Kingdom And while the research and information they present is sound the nutrition related health challenges with which developing countries must grapple differ considerably from those found in highly industrialized Western nations The primary aim of Community Nutrition for Developing Countries is to provide a book that meets the needs of nutritionists and other health professionals living and working in developing countries Written by both scholars and practitioners the volume draws on their wealth of knowledge experience and understanding of nutrition in developing countries to provide nutrition professionals with all the information they require Each chapter addresses a specific nutrition challenge currently faced by developing countries such as food security food safety disease prevention maternal health and effective nutrition policy In addition the volume serves as an invaluable resource for those developing and implementing nutrition education programmes With an emphasis on nutritional education as a means to prevent disease and effectively manage health disorders it is the hope of the nearly three dozen contributors to this work that it will enhance the health and well being of low income populations throughout the world

Introducing the Sociology of Food and Eating Anne Murcott, 2019-02-07 This textbook equips students with the ability to analyze and think critically about contemporary food topics. A thorough introduction to the sociology of food and eating, the book also acts as a primer to the discipline of sociology more generally. Chapters start with a common sense assumption about food which students frequently encounter in their own lives or in the mass media. Topics include family meals, ethnic cuisines, cooking skills and convenience foods, eating out, food waste and overpackaging. Anne Murcott shows how systematic academic research approaches can allow students to move beyond conventional wisdoms to examine sociological perspectives on food and eating. Key sociological concerns such as class, gender, age, ethnicity, power and identity are also introduced, accompanied by a wide range of examples from around the globe. By the end, readers will be able to think more critically and to apply sociological approaches to questions about food and society. *Introducing the Sociology of Food and Eating* is an essential introductory textbook for students in sociology and food studies. It provides readers with a solid basis for success in their studies and with a new understanding of their own attitudes to food and eating. **The Essence of Japanese Cuisine** Michael Ashkenazi, Jeanne Jacob, 2013-10-11 The past few years have shown a growing interest in cooking and food as a result of international food issues such as BSE, world trade and mass foreign travel, and at the same time there has been growing interest in Japanese Studies since the 1970s. This volume brings together the two interests of Japan and food, examining both from a number of perspectives. The book reflects on the social and cultural side of Japanese food and at the same time reflects also on the ways in which Japanese culture has been affected by food, a basic human institution. Providing the reader with the historical and social bases to understand how Japanese cuisine has been and is being shaped, this book assumes minimal familiarity with Japanese society but instead explores the country through the topic of its cuisine. *Food Safety and the WTO: The Interplay of Culture, Science and Technology* Marsha Echols, 2001-11-16 Today's international trade regime explicitly rejects cultural perceptions of what is safe to eat, overturning millennia of tradition. The World Trade Organization (WTO) Agreement on the Application of Sanitary and Phytosanitary Measures (SPS) enshrines science as the arbiter in resolving disputes involving this vital human need. This mandate, however, is under attack from many quarters. Critics cite environmental and ethical concerns, unpredictably changing technology, taste, food preferences, local

culture adequacy of governmental implementation of WTO standards and the reliability of scientific opinion A basic conflict has crystallized food as culture versus food as commerce The WTO SPS approach is increasingly challenged for its balance in favor of economic considerations and for its visible undermining of unique cultural identities This important book explores the relationship between the SPS Agreement food traditions science and technology It deliberately confronts those trade experts who refuse to allow other social sciences to influence their economics based trade theory The author ably investigates the local perception of food and food safety from the anthropological and historical points of view the evolution of food production technologies and the medicinal proscriptive taboo and security aspects of food that continue to prevail in nearly all cultures today She succeeds in demonstrating that no matter how strong the faith in science and economics it is unwise to flagrantly dismiss the deeply rooted beliefs of billions of people a huge majority of the world's population The Beef Hormones case the remaining sovereignty related to food safety measures the increasing significance of appropriate levels of protection and the precautionary principle the redefinition of food hazard to include production processes as well as food itself genetically modified seeds and food products the concept of risk in the science based context of the Codex Alimentarius these are among the issues and topics covered in depth The author concludes that although quick legal resolutions of trade disputes about what people should or should not eat might provide a win for open trade support for the entire structure and rationale of the WTO is undermined unless at the least some flexibility of interpretation is introduced into the WTO Dispute Resolution System in order to recognize the weight and validity of public opinion Food safety is arguably the most important issue affecting international commerce today urgently demanding enlightened discussion and action based on global consensus This well researched and thoughtful contribution offers significant clarification and perspective to policymakers lawyers academics and others engaged in this critical human drama in progress on the world stage

Elgar Encyclopedia of Food and Society Lewis Holloway, Michael K. Goodman, Damian Maye, Moya Kneafsey, Alexandra E. Sexton, Ana Moragues-Faus, 2025-08-11 Featuring over 120 entries from international experts this Encyclopedia provides a comprehensive overview of the activities ideas issues and challenges that shape relationships between food systems and society Each entry includes an accessible and informative introduction to its topic along with specific examples recommended further reading and references to other sources This title contains one or more Open Access chapters

Women on the Move Silvia Pellicer-Ortín, Julia Tofantshuk, 2018-07-17 Women on the Move Body Memory and Femininity in Present day Transnational Diasporic Writing explores the role of women in the current globalized era as active migrants the authors have brought together a collection of essays from scholars in diaspora migration and gender studies to take a look at the female experience of migration and globalization by covering topics such as vulnerability empowerment trauma identity memory violence and gender construction which will continue to shape contemporary literature and the culture at large

Food Cultures of China Qian Guo, 2023-07-27 Exploring the rich and varied culinary traditions of China this book enables

a better understanding of Chinese history and culture through food Part of Bloomsbury's Global Kitchen series this book takes readers on a food tour of China covering everything from daily staples to holiday specialties In addition to discovering China's long culinary history you'll learn about recent trends foreign influences and contemporary food and dietary concerns such as obesity and environmental sustainability Chapters are organized thematically making it easy to focus in on particular courses or types of dishes For those hungry for a more hands on approach each chapter includes a collection of accessible recipes that allow readers to bring the subject to life in their own kitchens The main text is supplemented by sidebars that offer interesting bite sized facts a chronology of important dates in China's culinary history and a glossary of key food and dining related terms Sun Yat sen the founding father of modern China asserted that China's food culture was the most advanced and sophisticated in the world despite the country lagging the West in science industry and civic engagement Today many people outside China immediately envision iconic dishes like fried rice egg rolls or sweet and sour pork when they think of Chinese food But China has a much richer and more diverse set of culinary traditions China's food culture is one of the oldest in the world evolving over thousands of years It has been shaped by a myriad of forces from historical struggles with food insecurity to the modern push toward speed and convenience Across this large nation unique cuisines emerged that reflect the varied geography climate and customs of different regions

Cuisine and Empire Rachel Laudan, 2013-11-21

Rachel Laudan tells the remarkable story of the rise and fall of the world's great cuisines from the mastery of grain cooking some twenty thousand years ago to the present in this superbly researched book Probing beneath the apparent confusion of dozens of cuisines to reveal the underlying simplicity of the culinary family tree she shows how periodic seismic shifts in culinary philosophy beliefs about health the economy politics society and the gods prompted the construction of new cuisines a handful of which chosen as the cuisines of empires came to dominate the globe Cuisine and Empire shows how merchants missionaries and the military took cuisines over mountains oceans deserts and across political frontiers Laudan's innovative narrative treats cuisine like language clothing or architecture as something constructed by humans By emphasizing how cooking turns farm products into food and by taking the globe rather than the nation as the stage she challenges the agrarian romantic and nationalistic myths that underlie the contemporary food movement
