The aim of this paper is to extend the concept of dynamic capabilities. Building on prior research, we suggest that there are three levels of dynamic capabilities which are related to managers' perceptions of environmental dynamism. At the first level we find *incremental* dynamic capabilities: those capabilities concerned with the continuous improvement of the firm's resource base. At the second level are *renewing* dynamic capabilities, those that refresh, adapt and augment the resource base. These two levels are usually conceived as one and represent what the literature refers to as dynamic capabilities. At the third level are *regenerative* dynamic capabilities, which impact, not on the firm's resource base, but on its current set of dynamic capabilities, i.e. those change the way the firm changes its resource base. We explore the three levels using illustrative examples and conclude that regenerative dynamic capabilities may either come from inside the firm or enter the firm from outside, via changes in leadership or the intervention of external change agents.

Introduction

The concept of dynamic capabilities (Eisenhardt and Martin, 2000; Teece, Pisano and Shuen, 1997) has evolved from the resource-based view (RBV) of the firm (Barney, 1986, 1991; Wernerfelt, 1984). RBV proponents argue that simultaneously valuable, rare, inimitable and non-substitutable resources can be a source of superior performance, and may enable the firm to achieve sustained competitive advantage (Barney, 1991). Dynamic capabilities have lent value to the

RBV arguments as they transform what is essentially a static view into one that can encompass competitive advantage in a dynamic context (Barney, 2001a, 2001b). Dynamic capabilities are 'the capacity of an organization to purposefully create, extend or modify its resource base' (Helfat *et al.*, 2007a, p. 1) and over the last few years the concept has received much attention in the form of publications (e.g. Eisenhardt and Martin, 2000; Helfat and Peteraf, 2003; Teece, Pisano and Shuen, 1997; Zollo and Winter, 2002) and conference presentations (e.g. Academy of Management Meeting 2004–2006; Strategic Management Conference 2004–2006). However, as highlighted in the *British Journal of Management* Special Call for Papers on 'The Practice of Dynamic Capabilities: Theory Development and Research' and by Helfat *et al.* (2007a) the concept is still in need of theoretical and empirical development.

In this paper we aim to develop the notion conceptually. Specifically we build on the work of Teece, Pisano and Shuen (1997), Eisenhardt and

An earlier version of this paper was presented at The Practice of Dynamic Capabilities: Theory Development and Research Workshop, Lancaster, 2006. We would like to thank the workshop participants for their useful comments concerning our research, and Mark Jenkins and Richard Schoenberg for their contribution to earlier drafts. We would also like to thank Professors Easterby-Smith, Lyles and Peteraf and three anonymous reviewers for their insightful comments. Thanks to their help we have been able to develop a clearer and more elaborated argument.
