Who Standard Acupuncture Point Locations:

WHO Standard Acupuncture Point Locations in the Western Pacific Region, 2008-06-05 Acupuncture has been practiced for more than 2500 years in the Western Pacific region and has become a global therapeutic method in recent decades. However, it was reported that acupuncturists differed by up to 25% in the acupuncture points they used, raising doubts and uncertainty regarding the efficacy and safety of acupuncture treatment as well as causing difficulties in the fields of acupuncture research and education. Member States therefore increasingly began to demand standardization in acupuncture point locations. Responding to this request, the WHO Western Pacific Regional Office initiated a project to reach consensus on acupuncture point locations and thus convened 11 serial meetings resulting in these guidelines. This Standard acupuncture point locations in the Western Pacific Region stipulates the methodology for locating acupuncture points on the surface of the human body as well as the locations of 361 acupuncture points. The Standard is applicable for teaching, research, clinical service, publication, and academic exchanges involving acupuncture.

Integrating East Asian Medicine into Contemporary Healthcare E-Book Volker Scheid, Hugh MacPherson, 2011-10-24 Traditional East Asian healthcare systems have moved rapidly from the fringes of healthcare systems in the West towards the centre over the past 50 years. This change of status for traditional medicines presents their practitioners with both opportunities and challenges as the focus shifts from one of opposition towards one of integration into biomedically dominated healthcare systems. Integrating East Asian Medicine into Contemporary Healthcare examines the opportunities and challenges of integrating East Asian medicine into Western healthcare systems from an interdisciplinary perspective. Volker Scheid and Hugh MacPherson bring together contributions from acknowledged experts from a number of different disciplines including clinical researchers, Chinese Medicine practitioners, historians, medical anthropologists, experts in the social studies of science, technology, and medicine to examine and debate the impact of the evidence-based medicine movement on the ongoing modernization of East Asian medicines. The book considers the following questions: What are the values, goals, and ethics implicit within traditional East Asian medical practices? What claims to effectiveness and safety are made by East Asian medical practices? What is at stake in subjecting these medical practices to biomedical models of evaluation? What constitutes best practice? How is it to be defined and
