Wired for Joy! Laurel Mellin,2010-06-15 Can you imagine a world where drug companies throw bake sales to make ends meet A world without all the jaw clenching nail biting and stress induced melt downs Eighty percent of health problems today are due to the downstream effects of stress so learning to break free from stress could dramatically improve your mood your relationships your health and your life In *Wired for Joy* researcher and New York Times bestselling author Laurel Mellin presents a simple yet proven way to train your brain to move through stress and back to joy Her method has been called the missing link in health care as it focuses on rewiring the emotional brain the caldron of our stress rather than the thinking brain which has been the focus of most other stress busting methods Based on the cutting edge science of neuroplasticity Mellin outlines the five states of the emotional brain For each state she presents a specific tool that easily and quickly switches the brain back to a state of well being Once you know how to make that switch life becomes easier and stress symptoms depression anxiety overeating high blood pressure tend to fade Finally instead of focusing on the symptoms of stress we can change the wiring that triggers it and experience new sense of freedom in our lives **Code to Joy** George

Pratt,Peter Lambrou,John David Mann,2013-03-05 The Proven Four Step Programto Lifelong Happiness All the positive thinking affirmations talk therapy and pharmaceuticals in the world will never be enough to make us as happy as we were designed to be according to acclaimed clinical psychologists George Pratt Ph D and Peter Lambrou Ph D That s because those approaches fail to address a third aspect of the human organism one that bridges the gap between mind and body the biofield Combining six decades of clinical experience with cutting edge research Drs Pratt and Lambrou have developed a revolutionary program for rediscovering and then never again letting go of your innate happiness in four simple proven steps
