The Psychology of Expertise Robert R. Hoffman,2014-02-25 This volume investigates our ability to capture and then apply expertise In recent years expertise has come to be regarded as an increasingly valuable and surprisingly elusive resource Experts who were the sole active dispensers of certain kinds of knowledge in the days before AI have themselves become the objects of empirical inquiry in which their knowledge is elicited and studied by knowledge engineers experimental psychologists applied psychologists or other experts involved in the development of expert systems This book achieves a

marriage between experimentalists applied scientists and theoreticians who deal with expertise It envisions the benefits to society of an advanced technology for capturing and disseminating the knowledge and skills of the best corporate managers the most seasoned pilots and the most renowned medical diagnosticians This book should be of interest to psychologists as well as to knowledge engineers who are out in the trenches developing expert systems and anyone pondering the nature of expertise and the question of how it can be elicited and studied scientifically The book s scope and the pivotal concepts that it elucidates and appraises as well as the extensive categorized bibliographies it includes make this volume a landmark in the field of expert systems and AI as well as the field of applied experimental psychology Technology-Enhanced Learning

,2010-01-01 Designing for technology enhanced learning TEL is often a demanding process It involves creating challenging learning tasks making sure that students have access to the right tools and resources and ensuring there are appropriate opportunities for them to learn with and from each other Good design is creative and it also depends on deep experience sound evidence about learning and an understanding of the capabilities of technology This book introduces the use of design patterns and pattern languages as ways of capturing and sharing TEL design knowledge The editors have assembled a team of authors who have pioneered research and development in this rapidly expanding field The book surveys the state of the art and identifies productive lines for future research It will be invaluable to researchers teachers students and professional TEL designers

Domain-Specific Languages in Practice Antonio Bucchiarone,Antonio Cicchetti,Federico Ciccozzi,Alfonso Pierantonio,2021-06-24 This book covers several topics related to domain specific language DSL engineering in general and how they can be handled by means of the JetBrains Meta Programming System MPS an open source language workbench developed by JetBrains over the last 15 years The book begins with an overview of the domain of language workbenches which provides perspectives and motivations underpinning the creation of MPS Moreover technical details of the language underneath MPS together with the definition of the tool s main features are discussed The remaining ten chapters are then organized in three parts each dedicated to a specific aspect of the topic Part I MPS in Industrial Applications deals with the challenges and inadequacies of general purpose languages used in companies as opposed to the reasons why DSLs are essential together with their benefits and efficiency and summarizes lessons learnt by using MPS Part II about MPS in Research Projects covers the benefits of text based languages the design and development of gamification applications and research fields with generally low expertise in language engineering Eventually Part III focuses on Teaching and Learning with MPS by discussing the organization of both commercial and academic courses on MPS MPS is used to implement languages for real world use Its distinguishing feature is projectional editing which supports practically unlimited language extension and composition possibilities as well as a flexible mix of a wide range of textual tabular mathematical and graphical notations The number and diversity of the presented use cases demonstrate the strength and malleability of the DSLs defined using MPS The selected contributions represent the current state of the art and practice in using JetBrains MPS to

implement languages for real world applications *International Perspectives on the Design of Technology-supported Learning Environments* Stella Vosniadou, Erik De Corte, Robert Glaser, Heinz Mandl, 2012-10-12 In recent years the use of technology for the purposes of improving and enriching traditional instructional practices has received a great deal of attention. However, few works have explicitly examined cognitive psychological and educational principles on which technology supported learning environments are based. This volume attempts to cover the need for a thorough theoretical analysis and discussion of the principles of system design that underlie the construction of technology enhanced learning environments. It presents examples of technology supported learning environments that cover a broad range of content domains from the physical sciences and mathematics to the teaching of language and literacy. The emphasis in this book is not on the design of educational software but on the design of learning environments. A great deal of research on learning and instruction has recently moved out of the laboratory into the design of applications in instructional settings. By designing technology supported learning environments instructional scientists attempt to better understand the theories and principles that are explicit in their theories of learning. The contributors to this volume examine how factors such as social interaction, the creation of meaningful activities, the use of multiple perspectives, and the construction of concrete representations influence the acquisition of new information and transfer.

The Furniture of John Shearer, 1790-1820 Elizabeth A. Davison, 2011-01-16 This book is a full color catalogue raisonne that interprets the distinctive furniture made by John Shearer, one of the most accomplished and intriguing furniture makers during the post Revolutionary period. Shearer emigrated from Scotland in the late 18th century and retained loyalist sympathies throughout his life, evidenced by the imagery and inscriptions sympathetic to various British causes such as the suppression of the Irish rebellion in 1798 and the British victory in the Battle of Trafalgar in 1805 that he worked into his furniture. Davison provides insight into the furniture's appeal to Anglo American patrons: not secret loyalists but men still culturally tied to Great Britain. Shearer's pieces are scattered among various collections, and many of them have been identified only in the last 25 years. This catalog is the only work in which all of Shearer's known pieces of furniture are presented in a single volume.

Levels of Organization in the Biological Sciences Daniel S. Brooks, James DiFrisco, William C. Wimsatt, 2021-08-24 Scientific philosophers examine the nature and significance of levels of organization, a core structural principle in the biological sciences. This volume examines the idea of levels of organization as a distinct object of investigation, considering its merits as a core organizational principle for the scientific image of the natural world. It approaches levels of organization roughly the idea that the natural world is segregated into part-whole relationships of increasing spatiotemporal scale and complexity in terms of its roles in scientific reasoning as a dynamic, open-ended idea capable of performing multiple overlapping functions in distinct empirical settings. The contributors, scientific philosophers with longstanding ties to the biological sciences, discuss topics including the philosophical and scientific contexts for an inquiry into levels, whether the concept can actually deliver on its organizational

promises the role of levels in the development and evolution of complex systems conditional independence and downward causation and the extension of the concept into the sociocultural realm Taken together the contributions embrace the diverse usages of the term as aspects of the big picture of levels of organization Contributors Jan Baedke Robert W Batterman Daniel S Brooks James DiFrisco Markus I Eronen Carl Gillett Sara Green James Griesemer Alan C Love Angela Potochnik Thomas Reydon Ilya T mkin Jon Umerez William C Wimsatt James Woodward
