From Bioeconomics to Degrowth Nicolae Georgescu-Roegen, 2011-03-28 Nicolae Georgescu Roegen 1906 1994 is considered today as perhaps the chief founder of the transdisciplinary field today known as Ecological Economics but that he defined himself as Bioeconomics In his later years Georgescu Roegen intended to write a book of this title that would systematize what he considered to be the most significant results of his work This project intends to resume this project publishing a collection of the most relevant Georgescu Roegen essays on Bioeconomics including previously unpublished papers

The Great Transition Mauro Bonaiuti, 2014 Recent events including the financial crisis and the gradual lessening of the planet's natural resources have raised the fundamental question as to whether the capitalist market system can survive its own contradictions or whether we are witnessing the outset of a profound change in civilization By deploying the tools of the science of complexity alongside those of historical research Mauro Bonaiuti tackles this basic question posed against a backdrop of declining marginal returns where growth in the complexity of industrial military and bureaucratic institutional apparatuses is thought to have led to progressive increases in economic social and environmental costs In this framework the economic crisis we are traversing grave as it is could be interpreted not as a simple cyclical crisis from which it is possible to escape by the traditional policies of supporting growth but as the outcome of a passage of civilization inscribed in the long term evolutionary dynamics of capitalism After the crisis that started in 2008 with millions of people unemployed with the failure of the economy to pick up and with the ever growing sense of precariousness and insecurity we are beginning to suspect that we are facing something more than a cyclical crisis

The Origins of Ecological Economics Kozo Mayumi, 2001-07-26 Nicholas Georgescu Roegen deserves to be called the father of ecological economics This book connects Georgescu Roegen's earlier work such as consumer choice theory and a critique of Leontief's dynamic model with his later ambitious attempt to reformulate the economic process as bioeconomics a theoretical alternative to neoclassical economics

Bioeconomics and Sustainability Nicholas Georgescu-Roegen, Kozo Mayumi, John M. Gowdy, 1999-01-01 Economists from around the world discuss Georgescu Roegen's 1906 94 theories in a number of areas but especially on environmental and energy economics They address such topics as how long neoclassical economists can continue to ignore his contribu

Bioeconomics and Sustainability Nicholas Georgescu-Roegen, 1999 These essays are in honour of Nicholas Georgescu

Roegen the economist s economist His theories are discussed with particular emphasis on environmental and energy economics A History of Ecological Economic Thought Marco P. Vianna Franco, Antoine Missemer, 2022-08-01

Contributing to a better understanding of contemporary issues of environmental sustainability from a historical perspective this book provides a cohesive and cogent account of the history of ecological economic thought The work unearths a diverse set of ideas within a Western and Slavic context from the Renaissance and the Enlightenment to the late 1940s to reveal insights firmly grounded in historiographical research and of import for addressing current sustainability challenges not least by means of improving our grasp on how humans and nature can generously coexist in the long term The history of ecological economic thought offered in this volume is rich and diverse encompassing views that are bound by the observance of the tenets of the natural sciences but which differ significantly in terms of the role of energy and materials to cultural development and the normative aspects involving resource distribution social ideals and policy making Combining the approaches of independent scholarly figures and scientific communities from different historical periods and nationalities the book brings elements that are still missing in the scarce literature on the history of ecological economic thought and highlights the underlying threads which unite such initiatives The book brings a fresh look into the historical development of ecological economic ideas and will therefore be of great interest to scholars and students of ecological economics environmental economics sustainability science interdisciplinary studies and history of economic thought Ecological Economics and Sustainable Development Herman E. Daly, 2007 This clear thinking collection brings together 25 of Daly s essays speeches reviews and testimonials from the past decade as a whole they provide a useful masterclass on the principles of ecological economics Daly s vision as well as his frustration with mainstream economists refusal to engage with his arguments comes through loud and clear New Scientist It s hard to imagine ecological economics without the numerous and profound contributions of Herman Daly These papers reveal the consistency of his analysis and clarity of exposition that have made him one of the most influential economists of his generation Because of Herman Daly we have a much better understanding of how economies relate to the environment why so much is wrong with this relationship and what must be done to fix it Peter Victor York University Canada This thrilling compilation outlines the origins of the young discipline of ecological economics by the intellectual leader of the movement Herman Daly He recounts how as a member of the recently demoted environment department at the World Bank he integrated ecology with economics during his six years in the bowels of the beast Herman lucidly and compellingly combines common sense with profound understanding of both economics and ecology to arrive at sustainable solutions to the global problematique Herman s rigorous yet compassionate solutions to climate change peak oil globalization vs internationalization poverty reduction and the unsung concept of scale leading to uneconomic growth are precisely what we need to prevent the current liquidation of our beautiful world This book will galvanize you into the action we need so much Robert Goodland Environmental adviser World Bank Group 1978 2001 In this

book written in crystal clear style Herman Daly reiterates the main points of his analysis and vision he praises some teachers John Ruskin Frederick Soddy Nicholas Georgescu Roegen Kenneth Boulding he fearlessly attacks some adversaries in the World Bank and MIT and he offers some advice to the government of his own country to the Russian Duma and especially to OPEC that if followed would change the world very much for the better Finally on a different line of thought he interrogates conservation biologists on their reasons for wanting to keep biodiversity since as biologists they claim that evolution has no particular purpose Why not let the Sixth Great Extinction run its course In other words science cannot provide an ethics of conservation which Herman Daly finds in religion more than in democratization deliberations Joan Martinez Alier Universitat Autonoma de Barcelona Spain Ecological Economics and Sustainable Development comprises a carefully chosen selection of some 25 articles speeches congressional testimonies reviews and critiques from the last ten years of Herman Daly's ever illuminating work This book seeks to identify the blind spots and errors in standard growth economics alongside the corrections that ecological economics offers to better guide us toward a sustainable economy one with deeper biophysical and ethical roots Under the general heading of sustainability and ecological economics many specific topics are here brought into relation with each other These include limits to growth full world versus empty world economics uneconomic growth definitions of sustainability peak oil steady state economics allocation versus distribution versus scale issues non enclosure of rival goods and enclosure of non rival goods production functions and the laws of thermodynamics OPEC and Kyoto involuntary resettlement and development resource versus value added taxation globalization versus internationalization immigration climate change and the philosophical presuppositions of policy including the policies suggested in connection with the topics above This fascinating work will appeal to scholars and academics of ecol

Towards an Integrated Paradigm in Heterodox Economics J. Gerber, R. Steppacher, 2011-12-12 The human imprint on the biosphere has become so pronounced in recent years that there has been talk of a new geological era the Anthropocene Gathering contributions from some of the world's foremost heterodox economists this book explores the new economic directions and paradigms that are required to respond to this crisis

The Origins of Ecological Economics, Post-growth Economics and Society Isabelle Cassiers, Kevin Maréchal, Dominique Méda, 2017-10-30 We stand on the threshold of a post growth world one in which the relentless pursuit of economic growth has ceased to constitute a credible societal project The symptoms that mark the end of an era are clear and incontrovertible a return to the regularities of the past is illusory The pursuit of economic growth no longer constitutes a credible societal project for ecological social and geopolitical reasons Edited by an impressive array of experts this book identifies several areas in which we must fundamentally rethink our societal organisation They ask what it means to abandon the objective of economic growth how we can encourage the emergence of other visions to guide society how global visions and local transition initiatives should be connected which modes of governance should be associated with the required social and technological innovations Alongside the necessary respect of ecological limits and

equity in distribution the promotion of autonomy involving all in the building of socio political norms could serve for guidance The topics addressed over the chapters range from the future of work to the de commodification of economic relations the search for new indicators of progress to decentralized modes of governance and from the circular economy to polycentric transitions Each contribution brings a unique perspective a piece of a larger puzzle to be assembled Post growth Economics and Society is an important volume to those who study ecological economics political economy and the environment and society It invites theorists as much as practitioners to re explore the roots of our societal goals and play an active role in the systemic shift to come *On Georgescu-Roegen's Contribution to Ecological Economics* Philip A.
