technology advancement and the impact of blockchain and Industry 4.0 in SC mapping. Adopting a multidisciplinary approach, this edited collection features international authors from a diverse range of disciplines including SC management, operations management, technology, and innovation management and sustainability. The book will be a valuable resource for global scholars, researchers, and upper level students across operations SC management and logistics as well as engineering and technology management.

Supply Chain Management Christine Harland, 2024-04-27. The book focuses on the development of the concept of supply chain management and the current state of knowledge on supply chain structure and infrastructure. It draws together knowledge from materials management, purchasing and supply management, operations management, industrial marketing and logistics perspectives as well as industrial economics, organizational behaviour, systems thinking and strategic management. Three key conceptual themes are developed: 1) the recognition of supply chain management as a multi-level endeavour; 2) the increasing aspirations for supply chain management to be a strategic, not just an operational concept; and 3) the view of the supply chain management research community as an academic discipline. The book also examines supply chain structure in terms of dyads, triads, chains, networks, supply bases, supply systems and supply markets. Supply chain infrastructure is discussed in terms of processes, roles and behaviours and draws on extensive international empirical research. Challenges for researchers are addressed such as interconnectedness in complex supply systems, the need for greater resilience and how public policy and public value can be impacted by research. It concludes with a co-authored chapter that examines the potential future identity of supply chain management.

Handbook of Research on Reinventing Economies and Organizations Following a Global Health Crisis Costa, Teresa Gomes da, Lisboa, Inês, Teixeira, Nuno Miguel, 2021-06-11. Due to the global health crisis, economies had to adapt to combat pandemic situations. In the present pandemic crisis, new legislation, methods, labor approaches, values and social behaviors have emerged with a huge impact in all organizations. However, countries have applied different solutions, procedures and rules to deal with crises. Therefore, the impact has been different per country. Organizations need to understand their customers and businesses not only to increase operational efficiency but also to increase stakeholder's satisfaction and their competitiveness in a sustainable way. Customers are becoming more exigent and markets more complex, calling for the need for higher differentiation. This was enhanced in this pandemic situation and to survive, organizations needed to change and adapt to the new normal. The *Handbook of Research on Reinventing Economies and Organizations Following a Global Health Crisis* deals with management and economic issues, particularly with the reinvention of businesses and economies due to the pandemic situation and the relevance of entrepreneurship, innovation and intensive knowledge used to deal with these changes. This book emphasizes the challenges, difficulties and opportunities for the success of businesses and economies in periods of crisis and provides information for dealing with entrepreneurship and innovation networks and complementarities to recover businesses. The chapters also point out possible opportunities, challenges and risks in the process of recovery, highlighting
