The Essentials of Islamic Banking, Finance, and Capital Markets John Oluseyi Kuforiji, 2022-11-15. This multidisciplinary book on Islamic finance covers Islamic economic financial and legal systems, insurance, takaful, commercial jurisprudence and the socio-political and political economy of the Islamic world. It examines the dichotomies and similarities between Islamic and conventional financial systems and suggests future roles and governance of Islamic financial institutions. Distinctive features of the second edition include an emphasis on the theoretical foundations of Islamic finance, the distinctions between the micro and macroeconomic concepts and theories to the readers and an expansion on Islamic approved forms of trade dealings, transactions and contracts. Furthermore, this work discusses the newly introduced Islamic capital market products of the years 2020 to 2022, including the transition from the inter-bank offer rates (IBORs) as global benchmark lending rate to the new risk-free rates (RFRs) that became effective on January 1, 2022, and discusses the transition of Saudi Arabia Monetary Agency to Saudi Central Bank in 2020. Though every effort is made to avoid tedious mathematical proof and derivatives, this work provides working calculations for the pricing of Islamic instruments and provides supplemental materials in the form of faculty resources and students' study guide and workbook.
