Neuroprosthetic Supersystems Architecture Matthew E. Gladden, 2017-05-13 This volume serves as a resource for the design and analysis of neuroprosthetic supersystems which can be defined as organizations either small or large simple or complex whose human members have been neuroprosthetically augmented While numerous other texts focus on the biomedical engineering of neuroprostheses as technological devices or on the biocybernetic engineering of the host device system comprising a neuroprosthesis and its human host this volume presents a unique investigation of the intentional creation of higher order supersystems that allow multiple neuroprosthetically augmented human beings to interact with one another and with external information systems in order to accomplish some shared task In essence this can be understood as the work of designing and managing neuroprosthetically enhanced organizations Individual chapters present an ontology of the neuroprosthesis as a computing device a biocybernetic ontology of the host device system an ontology of the neuroprosthesis as an instrument of cyborgization motivating and inhibiting factors for the organizational deployment of posthumanizing neuroprostheses by military organizations and other early adopters an introduction to enterprise architecture in the context of technological posthumanization an exploration of the implications of neuroprosthetic augmentation for enterprise architecture and considerations for the development of effective network topologies for neuroprosthetically augmented organizations The conceptual frameworks formulated within this book offer a wide range of tools that can be of use to policymakers ethicists neuroprosthetic device manufacturers organizational decision makers and others who must analyze or manage the complex legal ethical and managerial implications that result from the use of emerging neuroprosthetic technologies within an organizational context

Explaining Russian-German code-mixing Nikolay Hakimov, 2021 The study of grammatical variation in language mixing has been at the core of research into bilingual language practices Although various motivations have been proposed in the literature to account for possible mixing patterns some of them are either controversial or remain untested Little is still known about whether and how frequency of use of linguistic elements can contribute to the patterning of bilingual talk This book is the first to systematically explore the factor usage frequency in a corpus of bilingual speech The two aims are i to describe and analyze the variation in mixing patterns in the speech of Russian-German adolescents and young adults in Germany and ii to propose and test usage based explanations of variation in mixing patterns in three morphosyntactic contexts the adjective modified noun phrase the prepositional phrase and the plural marking of German noun insertions in bilingual sentences In these contexts German noun insertions combine with either Russian or German words and grammatical markers thus yielding mixed bilingual and German monolingual constituents in otherwise Russian sentences the latter also labelled as embedded language islands The results suggest that the frequency with which words are used together mediates the distribution of mixing patterns in each of the examined contexts The differing impacts of co-occurrence frequency are attributed to the distributional and semantic specifics of the analyzed morphosyntactic configurations Lexical frequency has been found to be another important determinant in this variation Other factors include recency or lexical priming in discourse in the case of prepositional phrases and phonological and structural similarities and differences in the inflectional systems of the contact languages in the case of plural marking

 Beno t Mandelbrot the father of fractal geometry rebelled against his uncle You ll take a scientific expedition into the secret
 heart of a cosmos you ve never seen Not just any cosmos An electrifyingly inventive cosmos An obsessive compulsive cosmos
 A driven ambitious cosmos A cosmos of colossal shocks A cosmos of screaming stunning surprise A cosmos that breaks five of
 science s most sacred laws Yes five And you ll be rewarded with author Howard Bloom s provocative new theory of the
 beginning middle and end of the universe the Bloom toroidal model also known as the big bagel theory which explains two of
 the biggest mysteries in physics dark energy and why if antimatter and matter are created in equal amounts there is so little
 antimatter in this universe Called truly awesome by Nobel Prize winner Dudley Herschbach The God Problem will pull you in

Lonely Mind of God Sherman O'Brien,2021-01-26 Current students of philosophy or armchair philosophers Want the answer
 to the Primordial Existential Question Why is there something rather than nothing While history has produced no shortage of
 attempted answers clearly none is the answer Now comes the unique perspective of acosmism to provide a complete and
 plausible answer After a lifetime of reflection acosmist Sherman O'Brien offers this analysis of the issues and a thoughtful
 reasoned answer to philosophy s most vexing question The acosmic answer requires no faith whatsoever either in
 supernatural or unexplained causes in fact it discourages it Acosmism rejects both traditional religion and philosophically
 neglectful science As a metaphysical system it is based on an epistemological insight with implications for immortality
 determinism ethics and ultimate purpose Reasoned wholly from the ground up its conclusion is the very meaning of existence
 The solution to the Omniscience Riddle becomes the key to understanding how the question is best stated and understood
 This book represents one person s effort to make sense of what is true and what only seems to be so Why is there something
 rather than nothing What is your potential role in the entirety of experience This foray into acosmism offers a path to the
 genuine understanding of both existence and reality Note the main text constitutes roughly two thirds of the total pages the
