**Reading »Black Mirror«** German A. Duarte, Justin Michael Battin, 2021-01-12 Very few contemporary television programs provoke spirited responses quite like the dystopian series Black Mirror This provocative program infamous for its myriad apocalyptic portrayals of humankind's relationship with an array of electronic and digital technologies has proven quite adept at offering insightful commentary on a number of issues contemporary society is facing This timely collection draws on innovative and interdisciplinary theoretical frameworks to provide unique perspectives about how confrontations with such issues should be considered and understood through the contemporary post media condition that drives technology use

**Ludopolitics** Liam Mitchell, 2018-12-14 What can videogames tell us about the politics of contemporary technoculture and how are designers and players responding to its impositions To what extent do the technical features of videogames index our assumptions about what exists and what is denied that status And how can we use games to identify and shift those assumptions without ever putting down the controller Ludopolitics responds to these questions with a critique of one of the defining features of modern technology the fantasy of control Videogames promise players the opportunity to map and master worlds offering closed systems that are perfect in principle if not in practice In their numerical rule bound and goal oriented form they express assumptions about both the technological world and the world as such More importantly they can help us identify these assumptions and challenge them Games like Spec Ops The Line Braid Undertale and Bastion as well as play practices like speedrunning theorycrafting and myth making provide an aesthetic means of mounting a political critique of the pursuit and valorization of technological control

**Experimental Games** Patrick Jagoda, 2020-12-07 In our unprecedentedly networked world games have come to occupy an important space in many of our everyday lives Digital games alone engage an estimated 2.5 billion people worldwide as of 2020 and other forms of gaming such as board games role playing escape rooms and puzzles command an ever expanding audience At the same time gamification the application of game mechanics to traditionally nongame spheres such as personal health and fitness shopping habit tracking and more has imposed unprecedented levels of competition repetition and quantification on daily life Drawing from his own experience as a game designer Patrick Jagoda argues that games need not be synonymous with gamification He studies experimental games that intervene in the neoliberal project from the inside out examining a broad variety of mainstream and independent games including StarCraft Candy Crush Saga Stardew Valley Dys4ia Braid and Undertale Beyond a diagnosis of gamification Jagoda imagines ways that games can be experimental not only in the sense of problem solving but also the more nuanced notion of problem making that embraces the complexities of our digital present The result is a game changing book on the sociopolitical potential of this form of mass entertainment
