

## CHAPTER 10: THE HISTORY OF THE UNITED STATES

### Introduction

The history of the United States is a complex and multifaceted story that spans centuries. It begins with the arrival of Native Americans on the continent, followed by the exploration and settlement by European powers. The United States was born out of a struggle for independence from British rule, and it has since grown into a global superpower. This chapter explores the key events and themes that have shaped the nation's identity and trajectory.

The early years of the United States were marked by westward expansion and the search for new lands. The Louisiana Purchase of 1803 doubled the size of the country, and the Texas Revolution of 1835-1836 led to the establishment of the Republic of Texas. The Civil War of 1861-1865 was a pivotal moment in the nation's history, as it resolved the issue of slavery and preserved the Union.

The late 19th and early 20th centuries saw the United States emerge as a global power. The Spanish-American War of 1898 marked the beginning of the country's imperial adventures, and the Progressive Era of the early 1900s brought about significant social and political reforms.

The mid-20th century was a period of great change for the United States. The Great Depression of the 1930s led to the New Deal, a series of programs and reforms that reshaped the economy and society. World War II (1941-1945) was a defining moment, as the United States played a crucial role in defeating the Axis powers.

The Cold War era (1945-1991) was a period of tension and competition between the United States and the Soviet Union. The space race, the nuclear arms race, and the Vietnam War (1955-1975) were all part of this era. The end of the Cold War brought about a new world order, and the United States emerged as the sole superpower.

The late 20th and early 21st centuries have seen the United States continue to shape the world. The end of the Cold War brought about a new world order, and the United States emerged as the sole superpower. The 9/11 attacks of 2001 led to the War on Terror, and the 2008 financial crisis led to the Great Recession.

Women, Gender, Remittances and Development in the Global South Ton van Naerssen,Lothar Smith,Marianne H. Marchand,2016-03-09 This book endeavours to take the conceptualisation of the relationship between transnational remittance exchanges and gender to a new level Thus inevitably it provides a number of case studies of relationships between gender and remittances from around the world highlighting different processes and practises Thereby the authors seek to understand the impact of remittances on gender and gender relations both at the sending as well as at the receiving end For each case study authors ask how remittances affect gender identities and relationships but also vice versa By itself this already adds a wealth of insights to a field that is remarkably understudied despite a volume of studies on gender and the feminization of migration in developing contexts Chapters take an open explorative approach to the relationship between gender and remittance behaviour with the aid of case studies focusing on transnational flows between migrants and countries of origin With the wide variety of cases this book is able to provide conceptual insights to better understand how remittances affect gender identity roles and relations at both the receiving and sending end and give specific attention to the roles of various actors directly and indirectly involved in remittance sending in current collectively organized remittance schemes from around the world

Migration and Poverty Edmundo Murrugarra,Jennica Larrison,Marcin Sasin,2010-11-24 This volume uses recent research from the World Bank to document and analyze the bidirectional relationship between poverty and migration in

developing countries The case studies chapters compiled in this book from Tanzania Nepal Albania and Nicaragua as well as the last policy oriented chapter illustrate the diversity of migration experience and tackle the complicated nexus between migration and poverty reduction Two main messages emerge Although evidence indicates that migration reduces poverty it also shows that migration opportunities of the poor differ from that of the rest In general the evidence suggests that the poor either migrate less or migrate to low return destinations As a consequence many developing countries are not maximizing the poverty reducing potential of migration The main reason behind this outcome is difficulties in access to remunerative migration opportunities and the high costs associated with migrating It is shown for example that reducing migration costs makes migration more pro poor The volume shows that developing countries governments are not without means to improve this situation Several of the country examples offer a few policy recommendations towards this end
