two semesters of a general chemistry laboratory program The material focuses on the lab experiences that reinforce the
concepts that not all experimental conclusions are the same and depend on identifying an appropriate experimental
procedure selecting the proper apparatus employing the proper techniques systematically analyzing and interpreting the
data and minimizing inherent variables As a result of good data a scientific and analytical conclusion is made which may or
may not be right but is certainly consistent with the data Experiments write textbooks textbooks don't write experiments A
student's scientific literacy grows when experiences and observations associated with the scientific method are encountered
Further experimentation provides additional cause effect observations leading to an even better understanding of the
experiment The 11th edition's experiments are informative and challenging while offering a solid foundation for technique
safety and experimental procedure The reporting and analysis of the data and the pre and post lab questions focus on the
intuitiveness of the experiment The experiments may accompany any general chemistry textbook and are compiled at the
beginning of each curricular unit An Additional Notes column is included in each experiment's Report Sheet to provide a
space for recording observations and data during the experiment Continued emphasis on handling data is supported by the
