Computer Based Projects for a Chemistry Curriculum Thomas J. Manning, Aurora P. Gramatges, 2013-04-04 This e book is a collection of exercises designed for students studying chemistry courses at a high school or undergraduate level. The e book contains 24 chapters each containing various activities employing applications such as MS excel spreadsheets and Spartan computational modeling. Each project is explained in a simple easy to understand manner. The content within this book is suitable as a guide for both teachers and students and each chapter is supplemented with practice guidelines and exercises. Computer Based Projects for a Chemistry Curriculum therefore serves to bring computer based learning a much needed addition in line with modern educational trends to the chemistry classroom.

Nanomaterials for Environmental Protection Boris I. Kharisov, Oxana Vasilievna Kharissova, H. V. Rasika Dias, 2014-08-27 This book is divided into four main sections thoroughly analyzing the use of nanomaterials for water, air, and soil solutions and emphasizing environmental risks. Providing background on nanomaterials two decade study it discusses the characterization and application of unconventional disinfectants called antimicrobial nanomaterials which fall into three categories and while seemingly harmless have potential hazards if applied improperly. Special attention is given to the process of remediation, synthetic techniques and properties of nanomaterials with examples to which new and trained readers in the field can relate and understand an interdisciplinary approach aimed at scientists in physical chemistry, nanotechnology and environmental sciences. Includes applications of non conventional techniques in environmental protection, furthers the development of applied nanoscience and nanotechnology, suggests new industrial projects and university courses addressing nanotechnology in and for the environment, includes applications for water, air, and soil protection.
