Agriculture and Industries Dept, 1893 **East European Accessions Index**, 1960 **Poetics of Liveliness** Ada Smalbegović, 2021-10-29 Can poetry act as an aesthetic amplification device akin to a microscope through which we can sense minute or nearly imperceptible phenomena such as the folding of molecules into their three dimensional shapes the transformations that make up the life cycle of a silkworm or the vaporous movements that constitute the ever shifting edges of clouds We tend to think of these subjects as reserved for science but as Ada Smalbegović argues twentieth and twenty first century writers have intermingled scientific methodologies with poetic form to reveal unfolding processes of change Their works can be envisioned as laboratories within which the methodologies of experimentation natural historical description and taxonomic classification allow poetic language to register the rhythms and durations of material transformation Poetics of Liveliness moves across scales to explore the realms

of molecules fibers tissues and clouds It investigates works such as Christian B k s insertion of a poetic text into the DNA code of living bacteria in order to generate a new poem in the shape of a protein molecule Jen Bervin s considerations of silk fibers and their use in biomedicine Gertrude Stein s examination of brain tissues in medical school and its subsequent influence on her literary taxonomies of character and Lisa Robertson s studies of nineteenth century meteorology and the soft architecture of clouds In their attempt to understand physical processes unfolding within lively material worlds Smailbegovi contends these poets have developed a distinctive materialist poetics Structured as a poetic cosmology akin to Lucretius s *On the Nature of Things* which begins at the atomic level and expands out to the vastness of the universe Poetics of Liveliness provides an innovative and surprising vision of the relationship between science and poetry [Indian Silk](#) ,2006
