The papers discuss the most serious problems affecting sustainable development. They consider the impact of economic constraints on the environment, taking into account the social aspects as well as the over-use of natural resources. Uncontrolled development can also result in damage to the environment in terms of the release of toxic substances and hazardous waste. The focus in the book is on more constructive and progressive approaches to the problems discussed to ensure sustainability. The hope is that through the shared experiences of experts, we can learn from past failure to avoid repeating similar mistakes while attempting to prevent emerging threats to the environmental and ecological systems. Fundamental to these concepts are an analysis of the inherent risks and the development of appropriate strategies.
