Business, Politics, and the State in Africa Doctor Tim Kelsall,2013-01-10 In recent years Africa appears to have turned a corner economically It is posting increased growth rates and is no longer the world s slowest growing region Commentators

are beginning to ask whether emerging from Africa is a new generation of lion economies to challenge the East Asian tigers This book goes behind the headlines to examine the conditions necessary not just for growth in Africa but for a wider business and economic transformation Contrary to neoliberal economics it argues that governments can play an important role in this through selective interventions to correct market failures and controversially that neo patrimonial governance need not be an obstacle to improved business and economic conditions Drawing on a variety of timely case studies including Rwanda Ethiopia Tanzania and Ghana this provocative book provides a radical new theory of the political and institutional conditions required for pro poor growth in Africa Fundamentals of Multinational Finance Michael H. Moffett, Arthur I. Stonehill, David K. Eiteman, 2009 By grounding concepts with case studies and real world examples this text familiarises finance and international business students with the fundamental concepts and tools necessary to implement an effective global financial management strategy **Computerworld** ,1977-04-25 For more than 40 years Computerworld has been the leading source of technology news and information for IT influencers worldwide Computerworld s award winning Web site Computerworld com twice monthly publication focused conference series and custom research form the hub of the world s largest global IT media network *The Principles of Project Finance* Rod Morrison, 2016-03-03 The Principles of Project Finance reviews the technique of project finance It explores step by step the key ingredients of the concept The book is aimed at a business savvy audience but one which is not necessarily up to speed on the concept and has a global reach by covering both OECD countries and the emerging markets Project finance is positioned at a key point between the global capital markets and the energy and infrastructure industries To explain and illustrate the ideas behind project finance the book is made of chapters written by a range of leading players in the market from around the world and is split into four sections The first reviews various themes and issues key to the project finance market views from bankers lawyers and advisers plus chapters on bank bond and multilateral finance and a look at environmental insurance and construction market issues The second section looks at how project finance is used in various sectors of the energy and infrastructure market renewable energy oil and gas mining PPPs and roads and transportation The third then takes an in depth look at various projects finance markets from around the world Australia Vietnam Indonesia India Turkey Russia Africa France USA and Brazil Finally the fourth section presents a series of Top 10 deal cases studies from the pages of Thomson Reuters Project Finance International PFI the leading source of global project finance information **Sustainable Education and Development—Green Buildings** Clinton Aigbavboa, Wellington Thwala, Joseph N. Mojekwu, Lawrence Atepor, Emmanuel Adinyira, Gabriel Nani, Emmanuel Bamfo-Agyei, 2024-11-22 This book is Volume 2 of the proceedings of 2023 Sustainable Education and Development Research Conference This volume concentrates on papers in the area of green buildings Despite considerable progress more than 700 million people worldwide still lack access to electricity and around 2.4 billion people continue to use harmful and polluting fuels for cooking While efforts have been made to promote renewable energy and

energy efficiency they have not been fast enough to achieve Sustainable Development Goal 7 Adding to the challenge the ongoing war in Ukraine has contributed to rising global energy prices and heightened energy insecurity in Europe In response to the energy crisis some European countries are planning to accelerate the transition to renewables and increase investments in clean energy and energy efficiency However others are considering a resurgence of coal which poses a risk to the overall green transition Between 2010 and 2020 the percentage of the global population with access to electricity increased from 83% to 91% with 1.3 billion people gaining access Nevertheless this leaves approximately 733 million people still without electricity and most of them reside in sub Saharan Africa Achieving universal access by 2030 the annual growth rate in access needs to accelerate from 0.5 percentage points to 0.9 percentage points necessitating significant efforts in low income fragile and conflict affected countries In 2020 69% of the global population had access to clean cooking fuels and technologies While more than half of those without access to clean cooking fuels live in Asia the 20 countries with the lowest percentage of people having access to clean cooking were predominantly least developed countries in Africa The share of renewable sources in total final energy consumption reached 17.7% globally in 2019 just slightly higher than the figure for 2015 The electricity sector leads in the adoption of renewables accounting for 26.2% of total final energy consumption in 2019 while the heat and transport sectors have made limited progress Global primary energy intensity defined as global total energy supply per unit of GDP improved from 5.6 megajoules per dollar 2017 purchasing power parity in 2010 to 4.7 megajoules in 2019 However the rate of improvement 1.6% per year on average since 2015 falls short of the 3.2% annual rate needed to reach Sustainable Development Goal 7.3 International financial flows to support clean and renewable energy in developing countries reached 10.9 billion in 2019 a 23.6% decrease from 2018 This decline occurred even before the onset of the COVID 19 pandemic Over a longer five year moving average average annual commitments decreased for the first time since 2008 from 17.5 billion in 2014 to 16.6 billion in 2019 Although developing countries achieved a record of 245.7 watts per capita in installed renewable energy generating capacity in 2020 small island developing States least developed countries and landlocked developing countries have lagged behind It would take least developed countries and landlocked developing countries nearly 40 years and small island developing States almost 15 years to reach the same level of progress as the average developing country in 2020 The 2023 SEDRC conference titled Sustainable Development and Education aims to redefine the understanding of research in the continent's development and the role of researchers The conference focusses on applied research discussions and its dissemination Researchers from research institutions academicians postgraduate students politicians and industry representatives will be the primary audience for the conference proceedings
