Inhaltsangabe Einleitung Der deutsche B rsenmarkt hat mit den Going Privates der Honsel AG und der Friedrich Grohe AG einen neuen Reifegrad erreicht In Zeiten in denen fast t glich Unternehmen in die verschiedenen Segmente der deutschen B rsen streben ist eine Ma nahme in der entgegengesetzten Richtung auf den ersten Blick verwunderlich Auf den zweiten Blick stellt ein Going Private jedoch einen logischen Schritt in einer Kette dar Mit der Erleichterung von Aktienr ckk ufen im Zuge des KonTraG 1998 und der Erweiterung des 43 B rsG wurde die Durchf hrung des Going Private schrittweise erm glicht 1999 haben die ersten Unternehmen diese M glichkeit genutzt Going Privates sind jedoch keine neue Ma nahme Bereits 1886 wurde der erste Going Private in den USA durchgef hrt Ihren H hepunkt fanden Going Privates dort etwa hundert Jahre sp

ter In Europa ist Großbritannien bei Going Privates mit ca. 50 Transaktionen allein im Jahr 1999 führend. Eine Investment Banking Weisheit lautet: What happens in New York on Monday happens in London on Tuesday and in Frankfurt the following Friday. Demnach können für Deutschland weitere Going Privates erwartet werden. Dem Going Private verwandte Transaktionen wie der Leveraged Buy Out einer GmbH hat es auch schon während der achtziger Jahre in Deutschland gegeben. Neu hingegen ist die Entwicklung, dass börsennotierte Gesellschaften als Zielgesellschaften für Buy Outs fungieren. Zielgesellschaften für Going Privates können unterbewertete Aktiengesellschaften, Tochtergesellschaften, die im Rahmen einer strategischen Neuausrichtung stärker in den Konzern eingebunden werden sollen, oder Eigenmergesellschaften, die in der Börsennotierung für sich keine Funktion mehr sehen, sein. Für Finanzinvestoren stellen Going Private Kandidaten attraktive Investitionsmöglichkeiten dar. Banken können aus der Finanzierung des Going Private neben einer Zinsmarge zusätzlich Einnahmen aus Beratungsleistungen generieren und durch geschickte Strukturierungen dieser Transaktionen eine gute Reputation im Markt auf- oder ausbauen.

Gang der Untersuchung: Die vorliegende Arbeit beschäftigt sich mit Going Privates und den Aspekten ihrer Fremdfinanzierung in Deutschland. Die Arbeit ist in zwei Hauptteile gegliedert. Im ersten wird zunächst das Going Private begrifflich und in seinen Ausprägungen definiert. Darauf folgt die Erläuterung der Gründe für ein Going Private. Anschließend werden mögliche Techniken zur Durchführung von Going Privates dargestellt.

Essays on Corporate Risk Governance Mr. Gaizka Ormazabal Sanchez, 2011. This dissertation comprises three papers on the governance of corporate risk.

1. The first paper investigates the role of organizational structures aimed at monitoring corporate risk. Proponents of risk-related governance structures such as risk committees or Enterprise Risk Management (ERM) programs assert that risk monitoring adds value by ensuring that corporate risks are managed. An alternative view is that such governance structures are nothing more than window dressing created in response to regulatory or public pressure. Consistent with the former view, I find that in the period between 2000 and 2006, firms with more observable risk oversight structures exhibit lower equity and credit risk than firms with fewer or no observable risk oversight structures. I also provide evidence that firms with more observable risk oversight structures experienced higher returns during the worst days of the 2007-2008 financial crisis and were less susceptible to market fluctuations than firms with fewer or no observable risk oversight structures. Finally, I find that firms without observable risk oversight structures experienced higher abnormal returns to recent legislative events relating to risk management than firms with observable risk oversight structures.
2. The most common empirical measure of managerial risk-taking incentives is equity portfolio vega. Vega, which is measured as the dollar change in a manager's equity portfolio for a 0.01 change in the standard deviation of stock returns. However, Vega exhibits at least three undesirable features. First, Vega is expressed as a dollar change. This implicitly assumes that managers with identical Vega have the same incentives regardless of differences in their total equity and other wealth. Second, the small change in the standard deviation of returns used to calculate Vega (i.e., 0.01) yields a very local approximation of managerial risk-taking incentives. If an executive's expected

payoff is highly nonlinear over the range of potential stock price and volatility outcomes a local measure of incentives is unlikely to provide a valid assessment of managerial incentives Third Vega is measured as the partial derivative of the manager's equity portfolio with respect to return volatility This computation does not consider that this partial derivative also varies with changes in stock price The second paper develops and tests a new measure of managerial risk taking equity incentives that adjusts for differences in managerial wealth considers more global changes in price and volatility and explicitly considers the impact of stock price and volatility changes We find that our new measure exhibits higher explanatory power and is more robust to model specification than Vega for explaining a wide range of measures of risk taking behavior 3 The third paper examines the relation between shareholder monitoring and managerial risk taking incentives We develop a stylized model to show that shareholder monitoring mitigates the effect of contractual risk taking incentives on the manager's actions Consistent with the model we find empirically that the positive association between the CEO's contractual risk taking incentives and risk taking behavior decreases with the level of shareholder monitoring Furthermore consistent with the board anticipating and optimally responding to shareholder monitoring boards of firms exposed to more intense monitoring design compensation contracts that provide higher incentives to take risks Overall our results suggest that when evaluating risk taking incentives provided by a compensation contract it is important to account for the firm's monitoring environment
