Kidney Disease in the Elderly Holly Kramer, Edgar V. Lerma, Holly Koncicki, 2024-12-26 The over 65 population in the United States is rapidly growing There are currently about 52 million people over 65 years of age in the United States or 16 5% of the U.S. population This percentage is expected to reach 22% or 70 million by 2050 This means that during the professional lives of current trainees they can expect to see an increasing number of older patients in their practice Average life expectancy in 2004 was 75 2 yr for men and 80 4 yr for women Due to the pandemic average life expectancy has decreased for both men and women with declines differing by race and ethnicity Overall current average life expectancy is 75 1 years for men and 80 5 years for women During the 1990s the over 85 population was the fastest growing group at 38% growth This older age group was the largest consumer of healthcare services By 2060 the number of people age 85 years and older is projected to triple from its current estimate of 6 7 million to 19 0 million A substantial percentage of this population has some level of disability sensory physical mental or self care Once a senior develops disability it greatly impacts their ability to self manage their disease and follow a complex medical regimen Patients with chronic kidney disease CKD usually require complicated medication routines complex dietary restrictions frequent medical visits and receive care from multiple physicians Thus providing nephrology care for older patients with CKD requires specific knowledge and skills that are unique to this population Elderly patients will make up a growing proportion of the practice of nephrologists and other providers physicians and allied health providers involved with their care Clinical practitioners will need to become more comfortable with shouldering the full care of this segment of their patient population and work closely with a geriatrician and internists and family practitioners As we become more willing to offer life prolonging technologies in this vulnerable group we need to be willing to deal with the consequences of this decision Finally with their elderly patients clinicians face challenging ethical problems such as whether to withhold or withdraw dialysis Unless addressed promptly and effectively these ethical issues will greatly increase the stress on both the healthcare provider and family members Capstone Pharmacy Review Barb Mason, 2013-02-15 Capstone Pharmacy Review is a helpful guide developed to assist pharmacy students preparing to sit for the NAPLEX certification exam in Pharmacy This valuable study tool reviews content relevant to the three basic competency areas guiding the NAPLEX exam associating a given guestion with the given competency The proportions of review material devoted to areas of pharmacy practice such as preparation and dispensing of medications pharmacotherapy considerations

Soriano, 2007-05-26 Prior to the evolution of modern medicine with its superabundance of diagnostic and therapeutic medical technology and the rise of the litigious society the value of clinical skills was evident in both history taking and the physical examination Even today physicians can make a correct di nosis solely by utilizing their clinical skills in about 90% of patient enco ters Furthermore in the past physicians understood their role as a psychologist and were more apt to be familiar with the social context of their patients House calls were common The doctor was also a placebo who at his best inspired hope and probably sped recovery Geriatricians use both clinical skills and take advantage of modern technology sparingly for they know they are dealing with the most ch lenging and frail of patients older patients who so often present with multiple complex interacting behavioral social and physical problems In contrast to medicine for young people working with the older patient is much more demanding Furthermore the complex issue of societal at tudes toward old people can come into play speci cally the physician s need to deal with natural fears of aging dependency depression dementia and death Ageism is the enemy of effective medical treatment At its best geriatrics exempli es ways that medical care for all ages can become more humane problem The SAGE Encyclopedia of Pharmacology and Society Sarah E. Boslaugh, 2015-09-15 The SAGE oriented and holistic Encyclopedia of Pharmacology and Society explores the social and policy sides of the pharmaceutical industry and its pervasive influence in society While many technical STM works explore the chemistry and biology of pharmacology and an equally large number of clinically oriented works focus on use of illegal drugs substance abuse and treatment there is virtually nothing on the immensely huge business Big Pharma of creating selling consuming and regulating legal drugs With this new Encyclopedia the topic of socioeconomic business and consumer and legal and ethical issues of the pharmaceutical industry in contemporary society around the world are addressed Key Features 800 signed articles authored by prominent scholars are arranged A to Z and published in a choice of electronic or print formats Although arranged A to Z a Reader s
