Iguchi, 2015-04-08 This book reveals the mechanisms underlying the convergence of car fuel economy regulations in Europe Japan and the US by drawing upon a constructivist theory of International Relations and law that focuses on business competition and environmental regulations It offers new understanding of the topic of cars and an issue of climate change discussing the emerging phenomenon of convergence of fuel economy regulations addressing the role of business actors in pushing for climate change action proposing the new model of agency with and beyond states and providing insightful case studies from Europe Japan and the US The opening chapter reviews the automobile industry and global climate change providing a background for the discussion to follow Chapter 2 Business Actors and Global Environmental Governance grounds the discussion in the field of environmental governance The third chapter is a case study examining the construction and timing of the European Union's climate policies for automobile CO₂ emissions discussing the underlying factors and the actors influencing the policies The following chapter argues that Japan adopted its stringent fuel economy regulations primarily because of industry competitiveness motivated by stringent environmental regulations in export markets and encouraged by a tradition of co regulation and corporatism to enhance the regulations Chapter 5 asks why the US the first

country to introduce fuel economy regulations spent two decades in regulatory stagnation and discusses how recent US fuel economy regulations came to converge with Japanese and European standards Chapter 6 compares contrasts and analyzes fuel economy regulations among the three case studies and identifies policy implications for the future climate governance for 2015 and beyond The final chapter explores applicability of the agency with and beyond the state model to other sectors and to climate governance as a whole
