Fuzzy Partial Differential Equations And Relational Equations Reservoir Characterization And Modeling Studies In Fuzziness And Soft Computing:

Fuzzy Partial Differential Equations and Relational Equations Masoud Nikravesh, Lofti A. Zadeh, Victor Korotkikh, 2013-04-17 During last decade significant progress has been made in the oil industry by using soft computing technology. Underlying this evolving technology there have been ideas transforming the very language we use to describe problems with imprecision, uncertainty, and partial truth. These developments offer exciting opportunities but at the same time it is becoming clearer that further advancements are confronted by fundamental problems. The whole idea of how human process information lies at the core of the challenge. There are already new ways of thinking about the problems within theory of perception based information. This theory aims to understand and harness the laws of human perceptions to dramatically improve the processing of information. A matured theory of perception based information is likely to be properly positioned to contribute to the solution of the problems and provide all the ingredients for a revolution in science, technology, and business. In this context Berkeley Initiative in Soft Computing (BISC) University of California Berkeley from one side and Chevron Texaco from another formed a Technical Committee to organize a Meeting entitled State of the Art Assessment and New Directions for Research to understand the significance of the fields' accomplishments, new developments, and future directions. The Technical Committee selected and invited 15 scientists and oil industry experts as technical committee members from the related disciplines to participate in the Meeting which took place at the University of California Berkeley and March 15-17 2002.

Fuzzy Partial Differential Equations and Relational Equations Masoud Nikravesh, 2004-01-21 This monograph presents the latest advances of fuzzy logic and soft computing in reservoir characterization and modeling. It proposes for the first time that future developments require perception based information processing. The book presents important steps in this direction by introducing fuzzy partial differential equations and relational equations. It provides a unique opportunity for soft computing researchers and oil industry practitioners to understand the significance of the changes in the fields by presenting recent accomplishments and new directions.

These papers constitute an important contribution to the theory and applications of fuzzy logic and soft computing methodologies.

Computational Intelligence in Biomedical Engineering Rezaul Begg, Daniel T.H. Lai, Marimuthu Palaniswami, 2007-12-04 As in many other fields, biomedical engineers benefit from the use of computational intelligence (CI) tools to solve complex and non-linear problems. The benefits could be even greater if there were scientific literature that specifically focused on the biomedical applications of computational intelligence techniques. The first comprehensive field
