1. Reproduced below is the telephone game from Section 4.2. Find all Nash equilibria in mixed strategies.

The Telephone Game

		Winnie	
		Call	Wait
Colleen	Call	0,0	2,3
	Wait	3,2	1,1

ANSWER: Let p denote the probability that Colleen chooses call and q the probability that Winnie chooses call. For Colleen to be indifferent, Winnie must randomize in such a way that Colleen's expected payoff from call is the same as her expected payoff from wait:

$$q \cdot 0 + (1 - q) \cdot 2 = q \cdot 3 + (1 - q) \cdot 1 \implies q = \frac{1}{4}.$$

Thus, if Winnie calls with probability $\frac{1}{4}$, then Colleen is indifferent between calling and waiting. Of course, for Winnie to find it optimal to randomize, she must receive the same expected payoff from her two pure strategies, which requires that Colleen choose p , so that

$$p \cdot 0 + (1 - p) \cdot 2 = p \cdot 3 + (1 - p) \cdot 1 \implies p = \frac{1}{4}.$$

Since this is a symmetric game, it is not surprising that the equilibrium is symmetric. The telephone game then has three Nash equilibria: (1) Colleen chooses call and Winnie chooses wait; (2) Colleen chooses wait and Winnie chooses call; and (3) both Colleen and Winnie choose call with probability $\frac{1}{4}$ and wait with probability $\frac{3}{4}$.

2. The count is three balls and two strikes, and the bases are empty. The batter wants to maximize the probability of getting a hit or a walk, while the pitcher wants to minimize this probability. The pitcher has to decide whether to throw a fast ball or a curve ball,

[An investigation of strategic decision making in Swedish and German companies based on Game Theory](#) Anke Steinmetz, Elke Eisemann, 2002-04-26 Inhaltsangabe

Abstract Game theory was established by the mathematician John von Neumann 1903 to 1957 and the economist Oskar von Morgenstern 1902 to 1977 who in 1944 published a among game theorists very well known work of literature called Theory of Games and Economic Behavior However in his book Spieltheorie und konomische Bei spiele Werner G th regards game theory not exclusively as an economic discipline although fundamental concepts of game theory have been inspired by economic questions and have been developed by economists Regarding game theory there are numerous applications in the

areas theoretical economy operations research statistical decision theory marketing politic and military science insurance mathematics sociology and psychology Aim of the dissertation is to give a general overview on game theory and especially to answer the following questions by analysing the Swedish and German replies of the questionnaire 1 Do strategic deciders of large companies know about game theory and do they use it as a strategic tool 2 What is the percentage of managers who are able to give correct answers when they are confronted with certain game situations 3 Are there any links between the characteristics of the manager and their ability to give correct answers to the game situations 4 Is it possible to find any differences between German and Swedish managers regarding 1 2 and 3 The dissertation does not contain all parts of game theory Only aspects the authors think to be the most important in connection with economy will be discussed
