Geek Heresy Rescuing Social Change From The Cult Of Technology:

Geek Heresy Kentaro Toyama, 2015-05-26 After a decade designing technologies meant to address education health and global poverty award winning computer scientist Kentaro Toyama came to a difficult conclusion Even in an age of amazing technology social progress depends on human changes that gadgets can't deliver Computers in Bangalore are locked away in dusty cabinets because teachers don't know what to do with them Mobile phone apps meant to spread hygiene practices in Africa fail to improve health Executives in Silicon Valley evangelize novel technologies at work even as they send their children to Waldorf schools that ban electronics And four decades of incredible innovation in America have done nothing to turn the tide of rising poverty and inequality Why then do we keep hoping that technology will solve our greatest social ills In this incisive book Toyama cures us of the manic rhetoric of digital utopians and reinvigorates us with a deeply people centric view of social change Contrasting the outlandish claims of tech zealots with stories of people like Patrick Awuah a Microsoft millionaire who left his engineering job to open Ghana's first liberal arts university and Tara Sreenivasa a graduate of a remarkable South Indian school that takes impoverished children into the high tech offices of Goldman Sachs and Mercedes Benz **Geek Heresy** is a heartwarming reminder that it's human wisdom not machines that move our world forward **Die**

Learning Mark Pegrum, 2020-01-01 This book explores mobile learning as a form of learning particularly suited to our ever more mobile world presenting a new conceptualisation of the value of mobile devices in education through the metaphor of lenses on learning With a principal focus on mobile assisted language learning MALL it draws on insights derived from MALL language literacy and cultural projects to illustrate the possibilities inherent in all mobile learning In its broad sweep the book takes in new and emerging technologies and tools from robots to holograms virtual reality to augmented reality and smart glasses to embeddable chips considering their potential impact on education and indeed on human society and the planet as a whole While not shying away from discussing the risks it demonstrates that handled appropriately mobile context aware technologies allow educators to build on the personalised and collaborative learning facilitated by web 2.0 and social media but simultaneously to go much further in promoting authentic learning experiences grounded in real world encounters In this way teachers can better prepare students to face a global mobile future with all of its evolving possibilities and challenges **Games and Education: Designs in and for Learning**, 2018-11-26 We live in a time of educational

transformations towards more 21st century pedagogies and learning In the digital age children and young people need to learn critical thinking creativity and innovation and the ability to solve complex problems and challenges Traditional pedagogies are in crisis and many pupils experience school as both boring and irrelevant As a response educators and researchers need to engage in transforming education through the invention of new designs in and for learning This book explores how games can provide new ideas and new designs for future education Computer games have become hugely popular and engaging but as is apparent in this book games are not magical solutions to making education more engaging fun and relevant Games and Education explores new designs in and for learning and offer inspiration to teachers technologists and researchers interested in changing educational practices Based on contributions from Scandinavian researchers the book highlights participatory approaches to research and practice by providing more realistic experiences and models of how games can facilitate learning in school

Designing XR Peter (Zak) Zakrzewski,2022-02-14 In Designing XR H C immersion is presented as a multi dimensional design problem which addresses the question of How can transformative design thinking based knowledge systems complement the existing HCI invention model to contribute to the creation of more socially viable and humane immersive media environments

Science and Religion Claudia May,Channon Visscher,2023-10-24 Science and Religion Perspectives Across Disciplines interweaves science technology engineering and math STEM fields with the arts humanities theology and psychology to cultivate discussion on science and religion alongside biblical interpretation This anthology is paradoxically ecumenical for it embraces unifying and disparate positions without being prescriptive or exclusive It is both synergistic and disruptive Building on this premise the Advent and Easter stories are examined through praxes from STEM theology and psychology Taken together this anthology allows for connection between disciplines by creating community in the midst of differing approaches to the study of science and religion

Enhanced Learning Environments Zeynep Taçgın,Andrew Hagan,2022-08-17 Representing a diverse range of academic perspectives from various disciplines to provoke original thinking engage critical analysis and fuel the desire to improve education this book is for those readers with a genuine interest in quality education and supporting technology One often hears the words Enhanced Learning Environments Technology and Innovation liberally applied in conversations with an assumption that their inclusion automatically improves the quality of education This book looks beyond mere buzzwords for the ground truth in how education technology and innovation can enhance theory and practice in pedagogy and andragogy It begins with a philosophical criticism about education and technology to remind us of our responsibility to teach purposefully before discussing entrepreneurial thinking regarding education The book then makes a strong case for how technology can impact life saving educational training and discusses immersive virtual reality learning environments for exploring the essential design components from the perspective of instructional designers and subject experts It also examines how state of the art Hollywood technology is now accessible to all and discusses the impact this may have on education The book concludes with

an analysis of the implications of the metaverse concept for a pioneering new frontier in future focused enhanced learning environments

The Oxford Handbook of Higher Education in the Asia-Pacific Region Devesh Kapur, Lily Kong, Florence Lo, David M. Malone, 2023-01-11 Since the turn of the millennium it has become clear that the Asia Pacific Region is economically the fastest growing continent in the world and is likely to remain so for some time despite the setbacks of the COVID 19 pandemic Asia Pacific's share of the world's Gross Domestic Product GDP doubled from 15 per cent to 30 per cent between 1970 and 2017 and is projected to account for half of global GDP by 2050 With South East and South Asia also growing rapidly with over half the world's population and three of the world's five largest economies Asia is soon poised to home half of the world's middle class a class that is both the driver and the product of higher education The quality of a country's system of higher education may be seen both as a gauge of its current level of national development as well as of its future economic prospects It is therefore natural that the putative Asian Century should generate interest in the region's higher education systems which on the one hand share common characteristics a fixation with credentials and engineering high technology especially among male students and business degrees while at the same time are also highly differentiated not only across countries but also within As such a better understanding of higher education achievements failings potential and structural limitations in the Asia Pacific Region is imperative This handbook presents a number of significant country case studies and documents cross cutting trends relating to among other things the trilemma faced by governments juggling competing claims of access accessible cost and quality the balance between teaching and research the links between labour markets demand and higher education supply preferred fields of study and their consequences the rise of the research university in Asia the lure of institutions of international reputation within the region new education technologies and their effects and trends in government policy within the wider region and sub regions

Technology and the Virtues Shannon Vallor, 2016-08-02 The 21st century offers a dizzying array of new technological

developments robots smart enough to take white collar jobs social media tools that manage our most important relationships ordinary objects that track record analyze and share every detail of our daily lives and biomedical techniques with the potential to transform and enhance human minds and bodies to an unprecedented degree Emerging technologies are reshaping our habits practices institutions cultures and environments in increasingly rapid complex and unpredictable ways that create profound risks and opportunities for human flourishing on a global scale How can our future be protected in such challenging and uncertain conditions How can we possibly improve the chances that the human family will not only live but live well into the 21st century and beyond This book locates a key to that future in the distant past specifically in the philosophical traditions of virtue ethics developed by classical thinkers from Aristotle and Confucius to the Buddha Each developed a way of seeking the good life that equips human beings with the moral and intellectual character to flourish even in the most unpredictable complex and unstable situations precisely where we find ourselves today Through an examination of the many risks and opportunities presented by rapidly changing technosocial conditions Vallor makes the case that if we are to have any real hope of securing a future worth wanting then we will need more than just better technologies We will also need better humans Technology and the Virtues develops a practical framework for seeking that goal by means of the deliberate cultivation of technomoral virtues specific skills and strengths of character adapted to the unique challenges of 21st century life that offer the human family our best chance of learning to live wisely and well with emerging technologies

Sustainable Wellbeing Futures Robert Costanza,Jon D. Erickson,Joshua Farley,Ida Kubiszewski,2020-05-29 Ecological economics can help create the future that most people want a future that is prosperous just equitable and sustainable This forward thinking book lays out an alternative approach that places the sustainable wellbeing of humans and the rest of nature as the overarching goal Each of the book s chapters written by a diverse collection of scholars and practitioners outlines a research and action agenda for how this future can look and possible actions for its realisation Learning Technologies in the Workplace Donald H Taylor,2017-05-03 Knowledge was once power difficult to find slow to transmit and coveted Now we can access almost the sum total of human information with a swipe of our thumbs The impact on the knowledge economy has been vast leaving learning and development L D professionals wondering how to keep pace Many organizations naturally turn to technology to ensure workplace learning at scale and at speed but stumble when it comes to successfully deploying and using it Learning Technologies in the Workplace examines 16 years of learning technology implementations to find the secrets behind the most successful Examples in the book from the Hershey Company and BP airlines tech companies and manufacturers point to four common factors Successful learning technology teams all have APPA a clear aim a people focus a wide perspective and a pragmatic can do attitude Learning Technologies in the Workplace gives readers practical pointers for each of these four points helping them implement and use learning technologies well with particular emphasis on the essential skill of identifying stakeholders and winning their support **Virtues of Renewal**

Jeffrey Bilbro, 2018-12-14 For over fifty years Wendell Berry has argued that our most pressing ecological and cultural need is a renewed formal intelligence a mode of thinking and acting that fosters the health of the earth and its beings Yet the present industrial economy prioritizes a technical self centered way of relating to the world that often demands and rewards busyness over thoughtful observation independence over relationships and replacing over repairing Such a system is both unsustainable and results in destructive far reaching consequences for our society and land In *Virtues of Renewal* Wendell Berry's *Sustainable Forms* Jeffrey Bilbro combines textual analysis and cultural criticism to explain how Berry's literary forms encourage readers to practice virtues of renewal While the written word alone cannot enact change Bilbro asserts that Berry's poetry essays and fiction can inspire people to as Berry writes practice resurrection Bilbro examines the distinct yet symbiotic features of these three genres demonstrating the importance of the humanities in supporting tenable economies He uses Berry's pieces to suggest the need for more robust language for discussing conservation ecology and the natural and regenerative process of death Bilbro additionally translates Berry's literature to a wider audience putting him in conversation with philosophers and theologians such as Ivan Illich Willie Jennings Charles Taylor and Augustine The lessons that Berry and his work have to offer are not only for those interested in cultivating the land but also for those who cultivate their communities and live mindfully In short these lessons are pertinent to all who are willing to make an effort to live the examined life Such formative work is not dramatic or quick but it can foster the deep and lasting transformation necessary to develop a more sustainable culture and economy

Data Governance and Policy in Africa Bitange Ndemo, Njuguna Ndung'u, Scholastica Odhiambo, Abebe Shimeles, 2023-08-14 This open access book examines data governance and its implications for policymaking in Africa Bringing together economists lawyers statisticians and technology experts it assesses gaps in both the availability and use of existing data across the continent and argues that data creation management and governance need to improve if private and public sectors are to reap the benefits of big data and digital technologies It also considers lessons from across the globe to assess principles norms and practices that can guide the development of data governance in Africa The book will appeal to scholars and students of data governance technology and public policy as well as practitioners and policy makers

The Efficiency Paradox Edward Tenner, 2018-04-17 A skillful and lucid *The Wall Street Journal* way of thinking about efficiency challenging our obsession with it and offering a new understanding of how to benefit from the powerful potential of serendipity Algorithms multitasking the sharing economy life hacks our culture can't get enough of efficiency One of the great promises of the Internet and big data revolutions is the idea that we can improve the processes and routines of our work and personal lives to get more done in less time than we ever have before There is no doubt that we're performing at higher levels and moving at unprecedented speed but what if we're headed in the wrong direction Melding the long term history of technology with the latest headlines and findings of computer science and social science *The Efficiency Paradox* questions our ingrained assumptions about efficiency persuasively showing how relying on

the algorithms of digital platforms can in fact lead to wasted efforts missed opportunities and above all an inability to break out of established patterns Edward Tenner reveals what we and our institutions when equipped with an astute combination of artificial intelligence and trained intuition can learn from the random and unexpected **Makerspaces, Innovation and Science Education** Michael Tan,2022-02-27 This book provides an overview to a range of theories in science and technology that inform the different ways in which makerspaces can be educative Makerspaces are an indispensable site for science technology engineering and mathematics STEM instruction and pose novel risks and opportunities for STEM instruction Educators are likely to reach towards activities that have a high degree of engagement but this might result in observations like it looks like fun but what are they learning Beginning from the question of how we know what we know in science the author asserts that understanding scientific knowledge requires us to know more than the abstract concepts typically presented in schools The social and material aspects of knowledge are also important these take the form of questions such as What is the interplay between knowledge and power How do we understand that we can have a feel for materials and artefacts that we cannot completely describe in words How do we know what ideas ought to be made real though technology and engineering Significantly this book also discusses the ethical dimensions of STEM education in thinking about the kinds of STEM education that could be useful for open futures This book will be useful to graduate students and educators seeking an expansive view of STEM education More generally these ideas outline a possible new strategy for a vision of school that is not merely training or preparing students for work Education needs to also prepare students for sociopolitical participation and with STEM being central to our contemporary lives this book provides insights for how this can happen in makerspaces

Roaming Africa Mirjam van Reisen,Munyaradzi Mawere,2019-10-24 What happens when digital innovation meets migration Roaming Africa considers how we understand modern day mobility in Africa where age old routes strengthen the resilience of people roaming the continent for livelihoods and security assisted by mobile communication Digital mobility expands connectivity around the world and also in Africa In this book the authors show that mobility resilience and social protection in the digital age are closely related Each chapter takes a close look at the migration dynamics in a specific context using social theory as a lens This book adopts a critical perspective on approaches in which migration is regarded merely as a hazard Edited by distinguished scholars from Africa and Europe this volume the second in a four part series Connected and Mobile Migration and Human Trafficking in Africa compiles chapters from a diverse group of young and upcoming scholars making an important contribution to the literature on migration studies digital science social protection and governance *The Other Digital China* Jing Wang,2019-12-10 Westerners tend to equate political action with revolution and open criticism leading to concerns that the less outspoken citizens of nonliberal societies are brainwashed complicit or paralyzed by fear Jing Wang shatters this myth showing how online activists in China are quietly building powerful coalitions for incremental social change **Navigating the Age of Chaos** Jamais Cascio,Bob Johansen,Angela F.
