, 2023-05-05 In the last several decades there has been a surge of interest in expertise in the social scientific philosophical and legal literatures While it is tempting to attribute this surge of interest in expertise to the emergence and consolidation of a knowledge society post industrial society or network society it is more likely that the debates about expertise are symptomatic of significant change and upheaval As the number of contenders for expert status has increased as the bases for their claims have become more diverse and as the struggles between these would be experts intensified expertise became problematic and contested In The Oxford Handbook of Expertise and Democratic Politics Gil Eyal and Thomas Medvetz have brought together a broad group of scholars who have engaged substantively and theoretically with debates regarding the nature of expertise and the social roles of experts to examine these areas within sociology and allied disciplines The analyses take an historical and relational approach to the topic and are motivated by the sense that growing mistrust in experts represents a danger to democratic politics today Among the topics considered here are the value and relevance of the boundary between experts and laypeople the causes and consequences of mistrust in experts the meanings and social uses of objectivity and the significance of recent transformations in the organization of the professions Bringing together investigations from social scientists philosophers and legal scholars into the political dimensions of expertise this Handbook connects interdisciplinary work done in science and technology studies with the more classic concerns topics and concepts of sociologists of professions and intellectuals *Handbook of Research on Leading Higher Education Transformation With Social Justice, Equity, and Inclusion* Reneau, Clint-Michael, Villarreal, Mary Ann, 2021-06-25 With the resurgence of race related incidents nationally and on college campuses in recent years acts of overt racism hate crimes controversies over free speech and violence continue to impact institutions of higher education Such incidents may impact the overall campus racial climate and result in a racial crisis which is marked by extreme tension and instability How institutional leaders and the campus community respond to a racial crisis along with the racial literacy demands of the campus leaders can have as much of an effect as the crisis itself As such 21st century university leaders must become more emotionally intelligent and responsive to emergent campus issues Improving campus climate is hard and to achieve notable gains higher education professionals will have to reimagine how they approach this work with equity influenced practices and transformative
