A Mindset for Mobile Learning Julian Stodd, 2012-11-08 The subject of this book is mobile learning but mobile means many things it means technology as in a mobile phone or tablet and it also means mobile learning courses themselves as well as being used to describe the

experience of learning in this way of experiencing mobile I m interested in all of these things in exploring what they each mean and how we can pull them together to provide a meaningful narrative of how we develop and experience mobile learning It s easy to think of mobile as just being a distribution channel like a television or a radio We can view the devices as just conduits to push content out to learners but this is to miss so much of the potential potential that is only unfolding to us as we speak People interact with mobile devices in fundamentally different ways they are social tools used to reinforce our standing fashion statements aspirational decoration sources of knowledge and power able to make us win a pub quiz or find a pizza but also business tools used to organize meetings remind us of deadlines and let us speak to the boss when we re running late Mobile devices transcend the traditional boundaries of our lives crossing over between the formal spaces of work and the informal social spaces that surround it The devices are not purely functional they are much much more It s important that we understand just how widely mobile has permeated our lives how often we reach into our pocket and ready our thumbs for action We need to recognize how it impacts on knowledge we used to have to know things whilst now we often only need to know how to find those things out fast Knowing how to use Google is often enough We need to develop a mindset for mobile learning
