Ian Chapman, 2015-09-01 In Experiencing David Bowie A Listener's Companion musicologist writer and musician Ian Chapman unravels the extraordinary marriage of sound and visual effect that lies at the heart of the work of one of the most complex and enduring performers in popular music Still active in a career now well into its fifth decade Bowie's influence on music and popular culture is vast At the height of the glam rock era Bowie stood head and shoulders above his peers His influence however would extend far beyond glam through successive changes of musical style and stage work that impacted upon wider popular culture through fashion film gender studies theatre and performing arts As Chapman suggests Bowie recognized early on that in a post war consumer culture that continued the cross pollination of media platforms the line between musician and actor was an ever thinning one Opposing romantic notions of authenticity in rock Bowie wore many faces challenging listeners who consider his large body of work with a bewildering array of musical styles covering everything from classic vaudeville to heavy metal glam rock to soul and funk electronic music to popular disco In Experiencing David Bowie Chapman serves as tour guide through this vast musical landscape tracing his development as a musical artist through twenty seven studio albums he generated Pivotal songs anchor Chapman's no nonsense look at Bowie's work alerting listeners to his innovations as composer and performer Moreover through a close look at Bowie's visuals in particular his album covers Chapman draws the lines of connection between Bowie the musician and Bowie the visual stage artist illuminating the broad nature of his art This work will appeal to not only fans of David Bowie but anyone interested in the history of modern popular music fashion stage and cinema and modern art Metaphor, Metonymy, the Body and the Environment Jeannette Littlemore, Marianna Bolognesi, Nina Julich-Warpakowski, Chung-hong Danny Leung, Paula Pérez Sobrino, 2023-07-20 By exploring the associations that people make between emotions and colours looking at how they vary across languages and exploring the explanations that people provide for the associations that they make this Element provides insight into the ways in which humans express emotions through colour and the reasons why they do so Metaphoric and metonymic language and thought play a key role on several levels in the formation of emotion colour associations interacting with physical environmental and social factors A strong metaphorical connection between the valence of the emotion and the lightness of the colours with which it is associated and between the intensity of an emotion and the saturation level of the colours with which it is associated is found However the strength of this association varies according to the linguistic background of the speaker and the gender in which the emotion is presented Unpacking Creativity Paula Pérez Sobrino, Jeannette Littlemore, Samantha Ford, 2021-09-02 Figurative communication the use of metaphor metonymy hyperbole and irony provides economy of expression clarity persuasiveness politeness evaluation and communication of emotions However it also increases the potential for misunderstanding in situations when people lack shared background knowledge This book combines theoretical frameworks with empirical studies that measure the effectiveness of different approaches to the use of figurative language in advertisements to show how to maximise the benefits of creative metaphor and metonymy in global advertising It highlights how subtle differences in colour layout and combinations of different kinds of figurative language affect the reception and appreciation of creative advertising shedding new light on the nature of figurative communication itself With a balance between theory experiments and practical case studies this book is accessible for academics in linguistics and communication studies as well as advertising and marketing professionals Color Theory and Its Application in Art and Design George A. Agoston, 2013-11-11 My aim in this introductory text is to present a comprehensible discussion of certain technical topics and recent developments in color science that I believe are of real interest to artists and designers I treat a number of applications of this knowledge for example in selection and use of colorants pigments and dyes and light Early in the book I discuss what color is and what its characteristics are This is followed by a chapter on pertinent aspects of

light light as the stimulus that causes the perception of color Then the subject of the colors of opaque and transparent nonfluorescent and fluorescent materials is taken up There are sections on color matching color mixture and color primaries Chapter 6 introduces the basic ideas that underlie the universal method CIE of color specification Later chapters show how these ideas have been extended to serve other purposes such as systematic color naming de termining complementary colors mixing colored lights and demonstrating the limitations of color gamuts of colorants The Munsell and the Ostwald color systems and the Natural Colour System Sweden are explained and the new Uniform Color Scales Optical Society of America are described Color specification itself is a broad topic The information presented here is relevant in art and design for those who work with pigments and dyes or with products that contain them such as paints printing inks plastics glasses mosaic tesserae etc \*\*Encyclopedia of Children, Adolescents, and the Media Jeffrey Jensen Arnett, 2007 Publisher Description The Role of the Media in Promoting and Reducing Tobacco Use Ronald M.
