Problem 5 (25 pts) FSM Circuit Timing Diagram and Re-Design.

- (10 pts) Draw the state transition diagram of the FSM represented by the following circuit.
- (10 pts) Draw the wave forms of A, B, A*, B* in following timing diagram for the following circuit.
- (5 pts) Modify the circuit so that the modified circuit would implement the same FSM by replacing the D flip-flop (that produces B) in the circuit by a J-K flip-flop (with inputs J_B and K_B and it will also generate B). You need to first write down a truth table to show how J_B and K_B depend on X and B, and then write down two Boolean equations of J_B and K_B as functions of X and B or just X. You do not need to re-draw the circuit.

Industrial Management Information System Design Productivity Measurement and Management 101 problems with complete solutions SI Units **Discrete Mathematics Using a Computer** John O'Donnell, Cordelia Hall, Rex Page, 2007-01-04

Computer science abounds with applications of discrete mathematics yet students of computer science often study discrete mathematics in the context of purely mathematical applications They have to figure out for themselves how to apply the ideas of discrete mathematics to computing problems It is not easy Most students fail to experience broad success in this enterprise which is not surprising since many of the most important advances in science and engineering have been precisely applications of mathematics to specific science and engineering problems To be sure most discrete math textbooks incorporate some aspects applying discrete math to computing but it usually takes the form of asking students to write programs to compute the number of three ball combinations there are in a set of ten balls or at best to implement a graph algorithm Few texts ask students to use mathematical logic to analyze properties of digital circuits or computer programs or to apply the set theoretic model of functions to understand higher order operations A major aim of this text is to integrate tightly the study of discrete mathematics with the study of central problems of computer science
