Machine Design Being Instructions for the Design of Motors and Generators Branches of Science Involved in Dynamo De sign

The following discussion of the design of dyna mos and motors will be confined to the consideration of direct current

machines The design of a dynamo and motor relates to three essen tial parts first the armature carrying the conductors in

which the electric energy is generated or absorbed second the field magnet that produces the magnetic field or ux in which

the armature revolves and third the various mechanical parts and arrangements necessary to carry out the electrical and

magnetic actions Thus three great branches of science electricity magnetism and mechanics are involved About the Publisher
