Developing Leadership Character Ivey Business Journal:

Developing Leadership Character Mary Crossan, Gerard Seijts, Jeffrey Gandz, 2015-12-22 This book focuses on the element of leadership that has largely been neglected in the literature character. Often thought to be a subjective construct, the book demonstrates the concrete behaviors associated with different character dimensions in order to illustrate how these behaviors can be developed and character strengthened. Based on research involving over 300 senior leaders from different industries, sectors, and countries, Crossan, Seijts, and Gandz developed a model for leadership character that focuses on eleven dimensions. The book begins by setting the context for the focus on character in business, asking what character is and whether it can be learned, developed, molded, or changed. Next, the book focuses on each dimension of leadership character in turn, exploring its elements and the ways in which it can be applied in a business setting. The book concludes with a summary of the key insights, an exploration of the interactions between the character dimensions, and a call to the reader to reflect on how to develop one's own and others' leadership character. Bridging theory and management practice, *Developing Leadership Character* will interest students and practitioners alike. Readers will benefit not only from a new robust theoretical framework for leadership character but will also learn how character can be developed further.

Building Leadership Character Amy Newman, 2018-03-28 Extending beyond traditional leadership books to offer readers a path for developing their own character, this compelling new text uses a storytelling approach and real-world cases to explore different dimensions of leadership character. With a clear, student-friendly writing style, bestselling author Amy Newman deftly captures various approaches in which corporations and people respond to situations in difficult times and learn from mistakes. Using real companies and situations, each chapter examines a leadership character dimension such as accountability, integrity, authenticity, and courage. Readers will learn to develop their own character, emotional intelligence, and leadership skills as they engage with assessments, reflection opportunities, and exercises.

Leadership in Practice Gerard Seijts, Karen MacMillan, 2017-09-19 Recent financial crises and other high-profile mismanagement cases have brought a spotlight to the quality of leader character in the business sector. *Leadership in Practice* is the first book to provide an authoritative collection of cases to engage students interested in the importance of the character of business leaders. The authors have compiled a collection of cutting-edge cases and readings, situating them within a theoretical landscape so students are familiarized with the concepts as they move through the text. The cases cover a wide range of successful businesses from the NFL to Apple and include notable controversies such as those surrounding Enron and Volkswagen. Alongside exclusive interviews and insights into the value of leadership character at individual, team, organizational, and societal levels, the book includes learning objectives and discussion questions to facilitate lively debate and interaction in the classroom. This volume will be a valuable supplement for students and instructors in any leadership class, as well as researchers and practitioners interested in exploring case studies that illuminate the nature of leadership in a business.

setting **Leadership Meta-Competencies** Dimitris Bourantas,Vasia Agapitou,2016-04-22 This book doesn't offer overrated success stories which in most cases cannot be imitated. It contains no check lists or recipes for success and it presents no theoretically based models. The meta competencies discussed in this refreshing book are timeless virtues of which effective leaders seem to possess but which are rarely if ever included in lists of competencies in the vast business leadership literature. They include Existential intelligence distinct from the much discussed emotional intelligence is about the ability to pose questions and reflect on fundamental issues in ways that develop a mature ability to interpret the world and better understand other people. Phronesis is the ability to exercise sound judgement based on skilful application of moral and political rationality. Solitude is a voluntary state achieved when an individual has the ability to momentarily withdraw and be free of external pressures and demands in order to concentrate on desired mental cognitive activities. Trust building is more often discussed in leadership literature. As a leadership competence it is about the ability to be credible, show trust in and respect for other people and inspire trust. For the curious business practitioner, business student or business educator wishing to consider aspects of leadership competence that have to some extent been hidden or forgotten, this book introduces the notion of meta competences and deals in detail with them.
