Handbook of Adult Development and Learning Carol Hoare, 2006 Adult development and learning have always existed as two separate fields of study with development falling under psychology and learning under education Recent advances in theory research and practice however have made it clear that an important reciprocal relationship exists between them advances in development frequently lead to learning and conversely learning quite often fuels development The synchronicity between development and learning is responsible for positive changes in many capacities including insight intelligence reflective and meta cognition personality expression interpersonal competence and self efficacy This

synchronicity is also leading to the growth of a new discipline at the borders of adult development and learning The Handbook of Adult Development and Learning is the first to bring together the leading scholars from both adult development and learning to explore what will form the foundation for this new discipline the latest research at the intersection of these fields It examines six major aspects of their intersection foundations key areas of integration the self system higher reaches of development and learning essential contexts and specific applications An introductory chapter explains why it is so important to recognize and fuel the growth of this new discipline Subsequent chapters review the latest theoretical and empirical literature and provide a rich itinerary for future research This handbook is a must read for all who promote optimal aging It will be an invaluable reference for scholars in development and education as well as rich resource for policy makers and practitioners such as corporate executives and human resource personnel

Developmental Transitions across the Lifespan Leo B Hendry, 2015-05-08 Choice Recommended Read Leo B Hendry is one of the foremost developmental psychologists of his generation His diverse range of interests have included studies on young people's involvement in competitive sports investigations into teacher and pupil relations in school adolescents leisure pursuits and their family relations parenting styles youth workers and mentoring youth unemployment adolescent health behaviours and transition to early adulthood His research interests now include work on ageing and retirement Developmental Transitions across the Lifespan is the first collection of Hendry's works and essentially joins the dots to provide an overarching perspective on lifespan development through a dynamic systems theory approach Underpinned by empirical research this collection of journal articles and book chapters is linked by a contemporary commentary which not only contextualises each piece within today's research climate but builds to provides an unorthodox comprehensive but above all compelling perspective on human development from childhood to old age Leo B Hendry's research output has been significant and influential This is an important book that will provide students and researchers in developmental psychology not only with an opportunity to view his contribution holistically but in connecting his range of research interests provides a new contribution to our understanding of lifespan development in its own right

Understanding Human Development Ursula M. Staudinger, Ulman E.R. Lindenberger, 2003-01-31 K Warner Schaie I am pleased to write a foreword for this interesting volume particularly as over many years I have had the privilege of interacting with the editors and a majority of the contributors in various professional roles as a colleague mentor or research collaborator The editors begin their introduction by asking why one would want to read yet another book on human development They immediately answer their question by pointing out that many developmentally oriented texts and other treatises neglect the theoretical foundations of human development and fail to embed psychological constructs within the multidisciplinary context so essential to understanding development This volume provides a positive remedy to past deficiencies in volumes on human development with a well organized structure that leads the reader from a general introduction through the basic processes to methodological issues and the relation of developmental constructs to social context and biological infrastructure This approach does not surprise After all the editors and most of the contributors at one time or another had a connection to the

Max Planck Institute of Human Development in Berlin whether as students junior scientists or senior visitors That institute under the leader ship of Paul Baltes has been instrumental in pursuing a systematic lifespan approach to the study of cognition and personality Over the past two decades it has influenced the careers of a generation of scientists who have advocated long term studies of human development in an interdisciplinary context
