Manuscript Title: Cognitive function and vitamin B12 and D among elders: A cross-sectional study

Manuscript Number (if known): [Click or tap here to enter text.](#)

In the interest of transparency, we ask you to disclose all relationships/activities/interests listed below that are related to the content of your manuscript. "Related" means any relation with for-profit or not-for-profit third parties whose interests may be affected by the content of the manuscript. Disclosure represents a commitment to transparency and does not necessarily indicate a bias. If you are in doubt about whether to list a relationship/activity/interest, it is preferable that you do so.

The author's relationships/activities/interests should be defined broadly. For example, if your manuscript pertains to the epidemiology of hypertension, you should declare all relationships with manufacturers of antihypertensive medication, even if that medication is not mentioned in the manuscript.

In item #1 below, report all support for the work reported in this manuscript without time limit. For all other items, the time frame for disclosure is the past 36 months.

Reporting and Publishing Research in the Biomedical Sciences Peush Sahni, Rakesh Aggarwal, 2018-08-21 This book eases the task of converting research work into a manuscript and covers the recent developments in publishing that often stump budding researchers. Few researchers in the biomedical sciences are trained in the essential skills of reporting their results and they seek help in writing a paper that will be acceptable for publication in the right journal and in presenting their results effectively at a meeting. As well as covering the basic aspects of preparing manuscripts for publication, the book discusses best practices and issues relating to the publication of biomedical research, including topics such as peer review, authorship, plagiarism, conflicts of interest, publication misconduct, electronic publishing, and open access journals. With more than two decades of experience in conducting workshops on writing scientific papers, the editors have brought together the expertise of 29 authors from seven countries to produce this one-stop guide to publishing research in biomedical sciences. This book is intended for young researchers who are beginning their careers and wish to hone their skills and understand the rigors of research writing and publishing. Principles of Scientific Writing and Biomedical Publication Phil B. Fontanarosa, Annette Flanagan, Philip Greenland, 2024 Publication of biomedical research is essential for improvement and advancement of medical science and clinical practice. The history of scientific publication, including journals devoted to medical science, dates to the 1600s. The number of peer-reviewed scientific journals is estimated to be in the tens of thousands, and the number of journals, especially with the increasing creation of open access publications, continues to expand. Yet despite the long history and ubiquitous nature of scientific publications, the core principles involved in biomedical publication, as well as the specific skills of writing and manuscript preparation, are not commonly taught in a formal or comprehensive way in medicine, public health, or research curricula. AMA Manual of Style The JAMA Network Editors, 2019-11-01 The AMA Manual of Style is a must-have resource for anyone involved in medical health and scientific publishing. Written by an expert committee of JAMA Network editors, this latest edition addresses issues that face authors, editors, and publishers in the digital age. Extensive updates are included in the References chapter with examples of how to cite digital publications, preprints, databases, data repositories, podcasts, apps, and interactive games, and social media. Full color examples grace the chapter on data display with newer types of graphic presentations and updated guidance on formatting tables and figures. The manual thoroughly covers ethical and legal issues such as authorship, conflicts of interest, scientific misconduct, intellectual property, open access, and public access and corrections. The Usage chapter has been revised to bring the manual up to date on word choice, especially in writing about individuals with diseases or conditions, and from various socioeconomic, racial, ethnic, and sexual orientation populations. Specific nomenclature entries in many disciplines are presented to guide users in issues of diction, formatting, and preferred terminology. Guidance on numbers, SI units, and math has been updated, and the section on statistics and study design has undergone a major expansion. In sum, the

answer to nearly any issue facing a writer or editor in medicine health care and related disciplines can be found in the 11th edition of the AMA Manual of Style Available for institutional purchase or subscription or individual subscription Visit AMAManualofStyle.com or contact your sales rep for more details Research Handbook on Intellectual Property and Technology Transfer Jacob H. Rooksby, 2020-02-28 Written by leading experts from across the world this Handbook expertly places intellectual property issues in technology transfer into their historical and political context whilst also exploring and framing the development of these intersecting domains for innovative universities in the present and the future
