Psychological Foundations of Education B. Claude Mathis, John W. Cotton, Lee Sechrest, 2013-09-17 Psychological Foundations of Education presents some of the principles of psychology that are relevant to learning and teaching. It presents an alternative answer to the problem of the bifurcation of general and educational psychology in the curriculum of teacher preparation. While the solution is provisional and has obvious imperfections, it is offered in the hope that it may stimulate discussion of the problem and other solutions and or explicit justifications for past practice. Key concepts discussed include teachers' attitudes and behavior, different types of learning, technology in education, forgetting and extinction, child development and intelligence measurements. Also covered are the assessment of educational achievement, the social psychology of the classroom and education in urban schools. This text should have a variety of uses in classes where students are preparing for teaching. It was written specifically for those situations in which the prospective teacher is introduced to psychology through a one or two semester integrated sequence.

An Introduction to the Psychology of Paranormal Belief and Experience Tony Jinks, 2011-11-08 When someone admits to a strange experience such as witnessing an unidentified flying object, having telepathic hunches or seeing angels or ghosts, listeners usually explain it away as mistaken perception, intoxication, ignorance or even mental illness. Though these unsympathetic psychology-based explanations remain the most popular responses to claims of the supernatural, those who use them often have little understanding of what such dismissive solutions actually entail. This study offers a balanced and accessible analysis of various explanations for the paranormal. By providing insight into how these theories are applied or misapplied to inquiry into the paranormal, it clarifies the relationship between the field of psychology and the supernatural. Instructors considering this book for use in a course may request an examination copy [here](#). *Recording for the Blind & Dyslexic, ... Catalog of Books*, 1996

Understanding Emotions Dacher Keltner, Keith Oatley, Jennifer M. Jenkins, 2018-11-29 Emotions are an inescapable part of the human experience. They motivate actions and reactions, guide our interpersonal and business relationships, inspire political and societal trends, and influence our sense of self and well-being. Emphasizing the broad practical reach of this field of study, *Understanding Emotions* draws from neuroscience, psychiatry, biology, genetics, the humanities, economics, and more to provide a strong foundation in core concepts. An easy-to-follow narrative arc encompasses the entire life span, while representative studies provide immediate insight into the real-world implications of important findings. This new Fourth Edition continues to provide clear and concise guidance toward the factors that drive emotion, with new revised and expanded discussions that reflect the current state of the field. Detailed coverage of social and anti-social motivations, moral judgment, empathy, psychological disorders, the physiological components of emotion, and many more equip students with the conceptual tools to probe deeper into the material and apply methods and techniques to their own personal lives.
