Simon's rejection of standard decision making models of neoclassical economics inspired social scientists worldwide to develop research programs in order to study decision making empirically. The main achievements regarded decision making for individual firms, markets, governments, and institutions. There are many scholars in the world that claim that Herbert A. Simon has precipitated something like a revolution in microeconomics focused on the concept of decision making. Among these scholars are the Editors of this book who believe that very few scientists produce seminal work in more than one field. Herbert A. Simon was one of them, that caliber of genius.
