Gated Communities Social Sustainability In Contemporary And Historical Gated Developments:

Gated Communities Samer Bagaeen, Ola Uduku, 2010-02-09 *Gated Communities* presents a collection of new writings by an international and interdisciplinary group of contributors which provides a historic socio political and contemporary cultural perspective of gated communities

Beyond Gated Communities Samer Bagaeen, Ola Uduku, 2015-06-12 Research on gated communities is moving away from the hard concept of a gated community to the more fluid one of urban gating The latter allows communities to be viewed through a new lens of soft boundaries modern communication and networks of influence The book written by an international team of experts builds on the research of Bagaeen and Uduku's previous edited publication *Gated Communities* Routledge 2010 and relates recent events to trends in urban research showing how the discussion has moved from privatised to newly collectivised spaces which have been the focal point for events such as the Occupy London movement and the Arab Spring Communities are now more mobilised and connected than ever and *Beyond Gated Communities* shows how neighbourhoods can become part of a global network beyond their own gates With chapters on Australia Canada Europe South America Asia Africa and the Middle East this is a truly international resource for scholars and students of urban studies interested in this dynamic growing area of research

The Gated City Emma Regina Morales, 2025-04-23 The book tells the story of the proliferation of gated communities and the privatisation of public life and public space in Mexico over the last three decades Drawing on research from Lomas de Angel polis in Puebla one of the largest gated communities in the world Emma Regina Morales explores why such fortified spaces have proved popular with middle class households Weaving together the multiple influences of housing policy predatory financial markets and an increased fear of crime the book sets out how policy makers and planners can improve decision making and provide non gated solutions to urban anxiety

Decentring Security Mark Bevir, 2018-12-07 Contemporary security governance often relies on markets and networks to link public agencies to non governmental actors This book explores the rise nature and future of these new forms of security governance across various domestic transnational and international settings The chapters reveal similarities and differences in the way security governance operates in various policy settings The contributors argue that the similarities generally arise because policy elites at various levels of governance have come to believe that security depends on building resilience and communities through various joined up arrangements networks and partnerships Differences nonetheless persist because civil servants street level bureaucrats voluntary sector actors and citizens all draw on diverse traditions to interpret and at times resist the joined up security being promoted by these policy elites This book therefore decentres security governance showing how all kinds of local traditions influence the way it works in different settings It pays particular attention to the meanings cultures and ideologies by which policy actors encounter interpret and evaluate security dilemmas This book was originally published as a special issue in *Global Crime*

Suburbia in the 21st Century Paul Maginn, Katrin B. Anacker, 2022-03-24 The majority of the world's population now live in urban

areas and the 21st century has been declared as the urban age. However, closer inspection of where people live in cities, especially within so-called advanced liberal democracies such as Australia, the United Kingdom, and the United States, reveals that most people live in different types of suburban environments. Drawing together scholars from across the globe, this book provides a series of national, regional, and local case studies from Australia, Canada, Finland, France, Ireland, Spain, the United Kingdom, and the United States to exemplify the diverse and dynamic nature and importance of suburbia in 21st-century urban studies, city building, and urbanism. This book explores the evolving social, physical, and economic character of the suburbs and how structural processes, market dynamics, and government policies have shaped and transformed suburbia around the world. It highlights the continuing importance of the suburbs and the suburban dream, which lives on albeit under increasing challenges such as the global financial crisis, structural racism, and the Covid-19 pandemic, which have given rise to various suburban nightmares.

Readings in Planning Theory Susan S. Fainstein, James DeFilippis, 2016-01-19. Featuring updates and revisions to reflect rapid changes in an increasingly globalized world, *Readings in Planning Theory* remains the definitive resource for the latest theoretical and practical debates within the field of planning theory. Represents the newest edition of the leading text in planning theory that brings together the essential classic and cutting-edge readings. Features 20 completely new readings out of 28 total for the fourth edition. Introduces and defines key debates in planning theory with editorial materials and readings selected both for their accessibility and importance. Systematically captures the breadth and diversity of planning theory and puts issues into wider social and political contexts without assuming prior knowledge of the field.

Citizenship and Identity in the Age of Surveillance Pramod K. Nayar, 2015-02-12. This book is a study of cultures of surveillance, from CCTV to genetic data gathering, and the new forms of subjectivity and citizenship that are forged in such cultures. It studies data bodies and space as domains within which this subjectivity of the vulnerable individual emerges. The book also proposes that we can see a shift within cultures of surveillance where, from active participation in the process of surveilling, a witness citizen emerges. The book therefore seeks to alter surveillance as a mere top-down system, instead arguing that surveillance is also a mode of engagement with the world, enabling trust, accountability, and eventually a responsible humanitarianism.

Allegories of the End of Capitalism Milo Sweedler, 2020-01-31. In *Allegories of the End of Capitalism*, Milo Sweedler deconstructs the events of films *Melancholia*, *Cosmopolis*, *Suffragette*, *Django Unchained*, *Elysium*, and *Snowpiercer*, the socio-political contexts they arise from, and enter into, and their impact on contemporary culture and life. He examines how filmmakers from six different countries across four continents give narrative and audio-visual form to the frustration and anger that burst into public view in 2011: the ongoing class war between the super-rich and the rest of the world's population, and the insurrection that it yet to come.

Americans Against the City Steven Conn, 2014-07-07. It is a paradox of American life that we are a highly urbanized nation filled with people deeply ambivalent about urban life. An aversion to urban density and all that it contributes to urban life, and a perception that the city was the place where big

government first took root in America fostered what historian Steven Conn terms the anti urban impulse In response anti urbanists called for the decentralization of the city and rejected the role of government in American life in favor of a return to the pioneer virtues of independence and self sufficiency In this provocative and sweeping book Conn explores the anti urban impulse across the 20th century examining how the ideas born of it have shaped both the places in which Americans live and work and the anti government politics so strong today Beginning in the booming industrial cities of the Progressive era at the turn of the 20th century where debate surrounding these questions first arose Conn examines the progression of anti urban movements He describes the decentralist movement of the 1930s the attempt to revive the American small town in the mid century the anti urban basis of urban renewal in the 1950s and 60s and the Nixon administration s program of building new towns as a response to the urban crisis illustrating how by the middle of the 20th century anti urbanism was at the center of the politics of the New Right Concluding with an exploration of the New Urbanist experiments at the turn of the 21st century Conn demonstrates the full breadth of the anti urban impulse from its inception to the present day Engagingly written thoroughly researched and forcefully argued *Americans Against the City* is important reading for anyone who cares not just about the history of our cities but about their future as well

Nayar,2019-05-13 Ecoprecarity Vulnerable Lives in Literature and Culture presents an examination of ecoprecarity the precarious lives that humans lead in the process and event of ecological disaster and the increasing precarious state of the environment itself as a result of human interventions in contemporary literary cultural texts It studies the representation of invasion narratives of the human body and the earth by alien life forms the ecodystopian vision that informs much environmental thought in popular cultures the states of ontological integrity and genetic belonging in the age of cloning xenotransplantation and biotechnology s capitalisation of life itself and the construction of the wild in

these texts It pays attention to the ecological uncanny and the monstrous that haunts ecodystopias and forms of natureculture that emerge in the bioeconomies since the late twentieth century

The Routledge Companion to Urban Regeneration Michael E. Leary, John McCarthy, 2013-10-30 In the past decade urban regeneration policy makers and practitioners have faced a number of difficult challenges such as sustainability budgetary constraints demands for community involvement and rapid urbanization in the Global South Urban regeneration remains a high profile and important field of government led intervention and policy and practice continue to adapt to the fresh challenges and opportunities of the 21st century as well as confronting long standing intractable urban problems and dilemmas This Companion provides cutting edge critical review and synthesis of recent conceptual policy and practical developments within the field With contributions from 70 international experts within the field it explores the meaning of urban regeneration in differing national contexts asking questions and providing informed discussion and analyses to illuminate how an apparently disparate field of research policy and practice can be rendered coherent drawing out common themes and significant differences The Companion is divided into six sections exploring globalization and neo liberal perspectives on urban regeneration emerging reconceptualizations of regeneration public infrastructure and public space housing and cosmopolitan communities community centred regeneration and culture led regeneration The concluding chapter considers the future of urban regeneration and proposes a nine point research agenda This Companion assembles a diversity of approaches and insights in one comprehensive volume to provide a state of the art review of the field It is a valuable resource for both advanced undergraduate and postgraduate students in Urban Planning Built Environment Urban Studies and Urban Regeneration as well as academics practitioners and politicians

The Urban Condition Brendan Gleeson, 2014-05-23 This book will speak to the new human epoch the Urban Age A majority of humanity now lives for the first time in cities The city the highest invention of the modern age is now the human heartland And yet the same process that brought us the city and its wonders modernisation has also thrown up challenges and threats especially climate change resource depletion social division and economic insecurity This book considers how these threats are encountered and countered in the urban age focusing on the issue of human knowledge and self awareness just as Hannah Arendt's influential *The Human Condition* did half a century ago *The Human Condition* is now *The Urban Condition* And it is this condition that will define human prospects in an age of default and risk Gleeson expertly explores the concept through three main themes The first is an exploration of what defines the current human condition especially the expanding cities that are at the heart of an over consumptive world economic order The second exposes and reviews the reawakening of forms of knowledge naturalism that are likely to worsen not improve our comprehension of the crisis The new science of urbanism in popular new literature exemplifies this dangerous trend The third and last part of the book considers prospects for a new urban and therefore human dispensation *The Good City* We must first journey in our urban vessels through troubled times But can we now start to plot the way to new shores to

a safer more resilient city that provides for human flourishing The Urban Condition attempts this ideal conceiving a new urbanism based on the old idea of self limitation The Urban Condition is an original timely book that reconsiders and redeploys Arendt s famous notion of The Human Condition in an age of cities and risk It brings together several important strands of human consideration urbanisation climate threat resource depletion economic default and critical knowledge and weaves them into a new analysis of the times It also looks to a future that is nearly with us of changed climate resource scarcity and economic stress The book journeys into these troubled times proposing the idea of Lifeboat Cities as a way of thinking about the human journey to come
