7 PRINCIPLES OF PRIVACY BY DESIGN

1

Proactive not reactive; preventative not remedial

Take a proactive rather than reactive approach to privacy. Identify and mitigate privacy risks before they happen.

2

Privacy as the default setting

Design privacy-by-default features to ensure that consumers don't have to take extra measures to protect privacy.

3

Privacy embedded into design

Take a privacy-first approach right from the initial stages of a product's development and design.

4

Full functionality — positive-sum, not zero-sum

Privacy is a positive-sum goal, not a zero-sum goal. Avoid the false idea of trade-offs between privacy and other functionalities.

5

End-to-end security — lifecycle protection

Prioritise the security of user data throughout its lifecycle, from data collecting to its deletion.

6

Visibility and transparency

Implement transparency by documenting and communicating actions clearly, through privacy and data-sharing policies.

7

Respect for user privacy

Keep the interests of your users at the core by building strong privacy safeguards and user-friendly systems.
